West Hill Best Grape Vines

GRAPES

Fredonia Grown

Where the Best Grape Vines are Grown

Since 1875 the West Hill Nurseries has been the headquarters for fine Grape Vines. There is no better place in the country than Chautauqua County for the growing of Grapes. Here you see large grape juice factories and wineries doing a nation-wide business from the products of our many vineyards.

Nation-Wide Distribution

Because of our large distribution the country over, you will find listed on page 7, grape vines that do best in certain districts. You will also find on page 8 a general list of Grapes with prices for 1-yr. and 2-yr. vines.

Low Prices—Quantity Production

We welcome inquiries from large buyers of grape vines. Our prices are most reasonable for quality, standard varieties.

BEST LEADING VARIETIES

AGAWAM, Red. An old favorite. Most widely planted of the standard red varieties. Its berries are unusually large, dark red, firm, rich in juice and piquant in flavor. The vine is particularly vigorous and is self fertile, ripens a little after Concord. One of the most reliable of Rogers' Hybrids.

BETA, Black. (Wine Grape.) A universal favorite. This somewhat new Grape is a cross between the best tame and wild varieties. It is particularly good for conserve, juice or jelly, because of its interesting wild grape flavor and somewhat tart tang. Beta is the hardiest of all Grapes, exceptionally satisfactory for far northern climes. Its sturdy growth and heavy foliage make it especially desirable for arbor and semi-ornamental planting.

BRIGHTON, Dark Red. Old popular favorite. Bunch large, long and shouldered; berries medium, skin thin, flesh tender, sweet and best quality. Ripens with or before Delaware. Vine vigorous and fairly productive. Yields best if planted among other varieties. A valuable and desirable Grape for garden and vineyard.

CACO, The New Red Grape. This newly developed red Grape is fast becoming a favorite of all for the home vineyard. A cross of Concord and Catawba, it has inherited the fine characteristics of each. It is by far the most bountiful of all the hardy Grapes, yielding astonishing harvests—large bunches of immense, gleaming Grapes, deep rich red, and amber colored. Their flavor is exceptional—full, sweet, winelike and refreshing. Ripens in September—highly recommended.

CAMPBELL, Black. Table variety. A handsome, large Grape, with blue bloom. Bunch large, usually double-shouldered and compact. Its flesh is sweet to the center, but rather hard and pulpy. It is not highly flavored, but good, not foxy. Its skin is tough and it is a good shipper. It ripens with the Concord, but colors up much earlier. Inclined to overbear and should be pruned closely.

CATAWBA, Red. (Wine Grape.) Commercial growers consider this the pick of the red Grapes. Last to ripen, it gives a long season of large, round berries, particularly sweet and sugary. They ripen to a dark, coppery tone, most attractive for selling or for serving.

Grape
Vines

CONCORD, Black. An old favorite. Concord still maintains its place as the most profitable crop Grape in the United States. Whether for market or home use, Concord should be the backbone of your planting. It is thrifty, productive and disease resistant. It matures early, keeps well, ships well, and always find ready sale. Big, wide shouldered bunches of bluish berries of sweet delicious flavor, unrivaled by any other variety. The Grape preferred for jam, jelly and conserve.

DELAWARE, Red. Popular wine and table Grape. The standard of excellence. Bunch and berry medium, compact; flesh juicy, very sweet and refreshing. Ripens with or before Concord. Vines very hardy and productive; a slow grower, requires rich soil, good culture and close pruning. Subject to mildew in poor grape sections and seasons.

DUNKIRK. A new Grape that glorifies the popular Delaware. Bunches and berries similar to those of Delaware, but both are larger, and the crop ripens later and keeps longer. The skin is thin like that of Delaware, of the same color, but is tough enough to make the Grapes good shippers. The clusters are unusually uniform in shape and size, compact and well filled by the berries. The vine is vigorous, hardy, healthy, and productive.

Order Early—Stock will be Shipped at Proper Planting Season

The Portland
The wonder early white Grape. Big, sweet, satisfying.
See description on next page.

WEST HILL Best Grape ~ Vines

FREDONIA

In Blacks It's the Lovely Fredonia Grape

Each year this new Grape is becoming more popular and is a true companion to the famous Concord. Ripening some 15 days earlier, it is popular in the Grape-growing sections. A juicy, delicious black Grape, vine vigorous and productive; flesh is solid and the berries do not crack. A fine shipper.

GOETHE. (Rogers No. 1.) Light red. Bunch large, berries very large; flesh sweet and juicy; ripens about with Catawba. Vine vigorous, rank grower, and generally healthy. Good keeper; highly esteemed in the South for table and wine.

GOLDEN MUSCAT

(See back cover for illustration.)

Every home, in city or country, should have some Golden Muscats. They can be used in so many ways, fresh, or for jellies, jams, sauce, wholesome, healthful and appetizing. At last a successful introduction with texture similar to the white California Grape. The clusters are very large, heavy, long, broad, tapering and compact. For best results they require a good commercial fertilizer every spring. **We offer a limited supply of nice, strong vines in lots of ten for \$4.50.**

DIAMOND, White. One of the hardiest, most productive and vigorous of the white varieties, a splendid mid-season Grape. Berry is rich sunny, yellowish green, big, plump, full of sweet flavorful juice, and almost free from seeds. Desirable for both home and market.

ELVIRA, White. Bunch and berry of medium size and very compact. Ripens about with the Catawba. A very strong, robust and healthy grower and as productive as anything we have yet seen. Highly prized as a wine grape in the South.

HERBERT. (Rogers No. 44.) Black. Bunch and berry very large; flesh sweet, tender and of good quality. Early, hardy, and productive. One of the best of Rogers' Hybrids.

IVES, Black. Bunch and berry medium; compact. Colors early but is not fully ripe until after Concord. Quality fairly good when fully ripe. Very healthy, hardy, vigorous and productive. A generally successful market Grape.

LINDLEY. (Rogers No. 9.) A red Grape of best quality and one of the most desirable of Rogers' Hybrids. Medium to large in bunch and berry; flesh tender, sweet and of aromatic flavor. Ripens with Concord. Carries and keeps well. Vine vigorous, hardy and healthy. This Grape seems to be more productive when mixed with other varieties and grown on clay soil.

LUCILE The Leading Red

We consider this one of the most beautiful and an outstanding hardy Grape. The berries are wine-red in color, very large, rich and sugary. Leading horticulturists and Experimental Stations claim it has no equal for home use.

See illustration and collection offer on page 6.

Grapes for All-Season Vineyards

STRONG VINES

MOORE'S, Black. This might be called an early Concord; similar to it in appearance and quality, but ripening two weeks earlier. Most reliable of the very early varieties, vigorous, healthy, bearing heavily. The vines grow increasingly productive as they attain age. The bunches are good size; the berries, big, deep, purplish black, have a sweet delightful flavor.

NIAGARA, White. The "Concord" of the White Grapes. Most widely known and usually best liked of this class. Bunches are somewhat larger than Concord, greenish tone, which turns pale yellow when fully ripe. Skin is thin but tough, making a good shipper. Popular with vineyardists and amateurs north and south.

ONTARIO, White. Very early. Ripens with Winchell. Produces large, compact clusters of good size and wonderful flavor, strong and hardy. Another origination of the New York State Experiment Station. A promising variety.

PORTLAND

The Earliest Known Grape

A new white Grape developed in Fredonia, New York. Ripens earlier than any other known Grape, which permits its being planted over a wide range of territory. Berries large, and have that beautiful amber color like the Niagara. All the truly good qualities desired in a Grape and incorporated in it. Quality excellent—equal to the Niagara and other later Grapes. It contains much sugar and can be eaten before it is fully ripe. Vine hardy and productive. This new Grape will please you. Makes a beautiful showing with Fredonia and Lucile.

SHERIDAN, Black. A new Grape of recent development. Ripens one week later than Concord, which it surpasses in flavor. Bunch and berry large. One of its most valuable characteristics is its excellent keeping qualities.

URBANA

A New Hardy Red Variety With European Grape Qualities

This eastern Grape has the meaty fruit and the fine flavor of California varieties, yet you can grow it in your own garden. Both the bunch and berries are large and meaty. Very sweet. Good keeper. Makes a clear, bright red jelly of excellent flavor. Can be grown successfully south of the Great Lakes.

Season one week after Concord. We recommend this variety very highly.

VANBUREN. The best very early, black Grape so far introduced. Cluster medium to large, compact; berry little smaller than Concord, and equal if not superior to Concord in quality. For roadside markets and home, it should prove most valuable.

WORDEN, Black. A seedling of Concord which ripens about ten days earlier. It bears bunches and berries considerably larger, and is considered tenderer and richer in flavor. Particularly good for the home garden because it is strongly immune to fungous diseases. Wordens fill the gap between Moore's Early and Concord.

BROCTON—SENECA

TWO NEW GRAPES

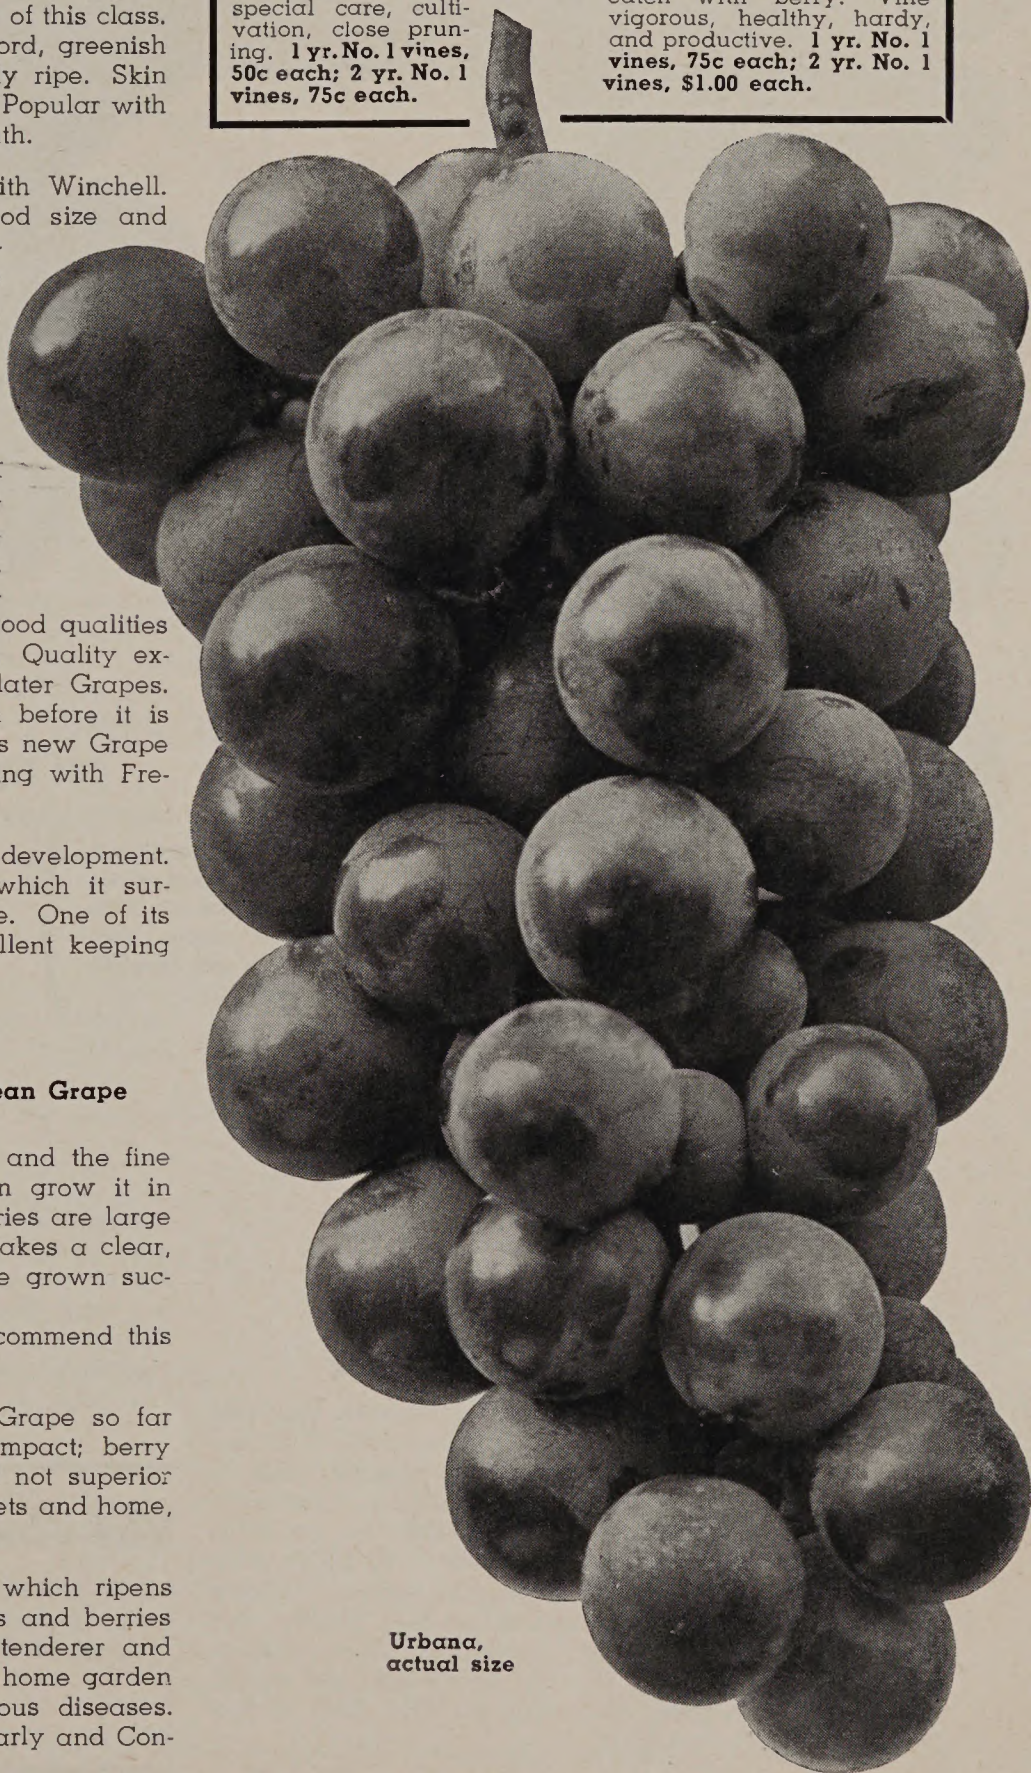

Publicized in the National Farm Magazine. Each has some meritorious characteristics that are well worthy of trial.

BROCTON

Midseason, white. Diamond type. Bunches larger. Sweet and melting. Excellent for dessert, roadside markets. Slow grower. Must be given special care, cultivation, close pruning. **1 yr. No. 1 vines, 50c each; 2 yr. No. 1 vines, 75c each.**

SENECA

Is almost pure Vinifera, ripening in early midseason. Bunches are tapering. Oval yellow berries. Texture firm. Skin can be eaten with berry. Vine vigorous, healthy, hardy, and productive. **1 yr. No. 1 vines, 75c each; 2 yr. No. 1 vines, \$1.00 each.**

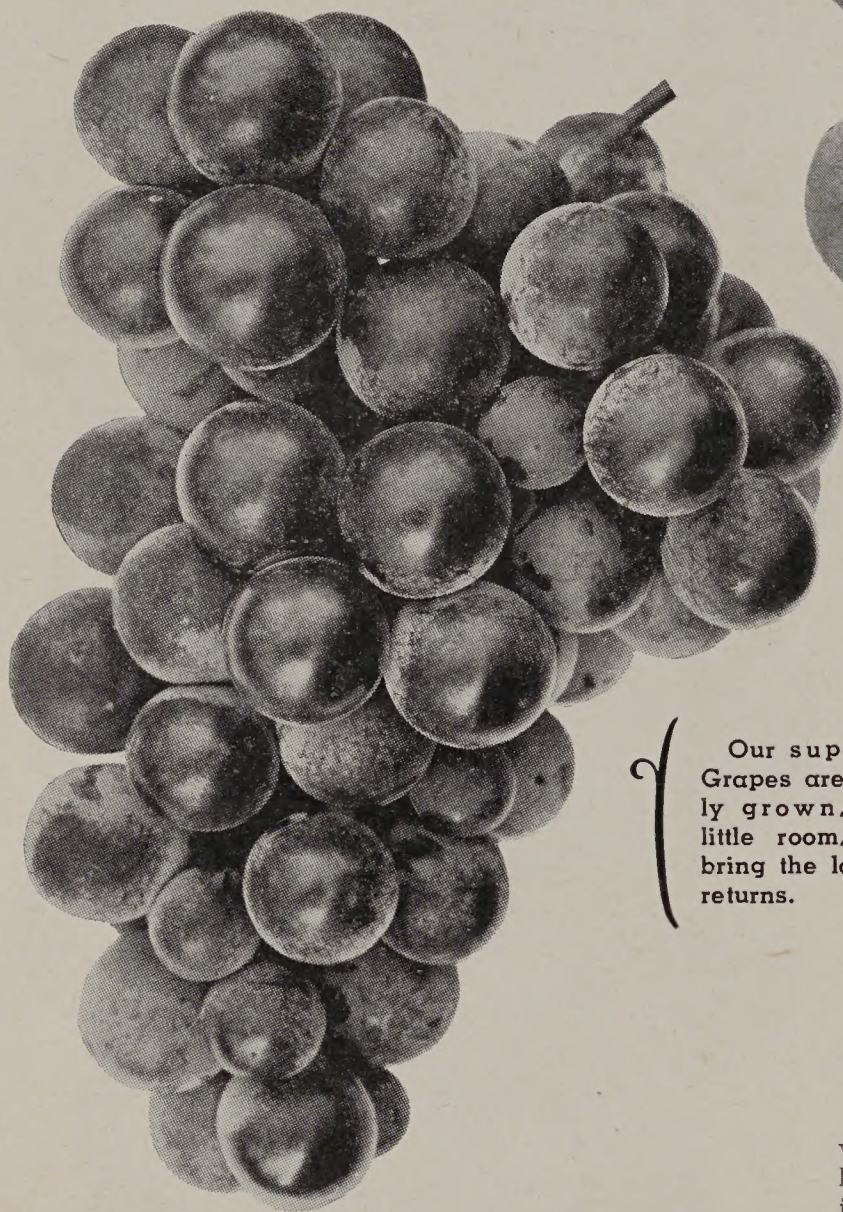

Urbana,
actual size

The All-American Red, White and Blue

Bear Every Year and Grow Productively Most Anywhere With No Trouble

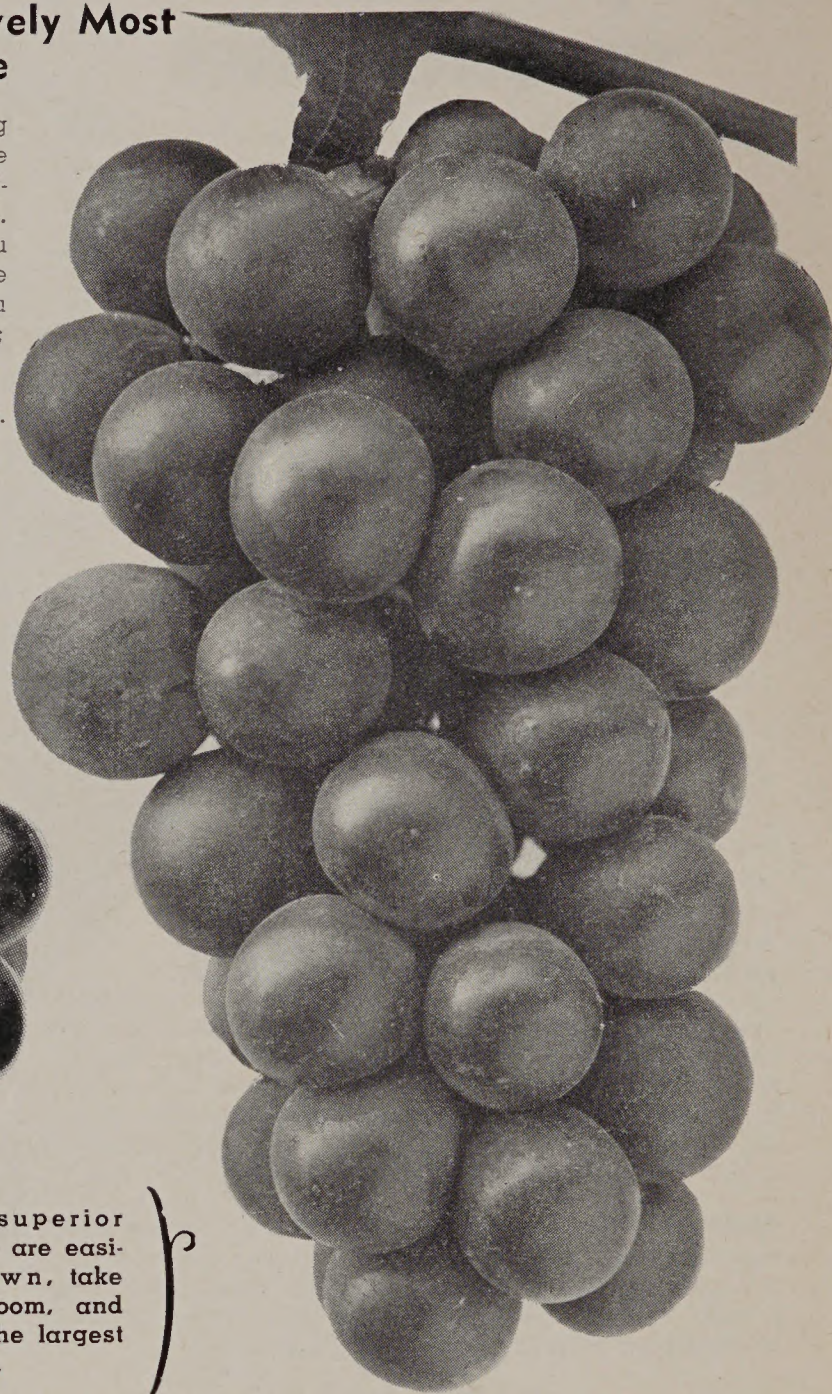

Grapes are the most dependable of all fruits—lasting a lifetime. Every home, in city or country, should have some Grape vines. They can be used in so many different ways, fresh, or for jellies, jams, sauce, grape juice. They are wholesome, healthy and appetizing. If you make your own Grape juice it is not expensive. The three varieties shown on these two pages will give you three of the best colors in Grapes: Concord, blue-black; Lucile, red; and Niagara, white.

Plant these three varieties in your garden this spring. They are Fredonia-grown, the best obtainable.

CONCORD — Blue-Black

Concord is without doubt the most productive, the most popular and profitable variety yet introduced. It is the standard of excellence, quality, and always finds a ready market, and buyers everywhere pay a premium for this superior quality Grape. Concord is perfectly hardy, having withstood a temperature of 30 below zero without injury. Bunches are large and compact, berries large, bluish black, sweet and juicy, fine quality and flavor. Discovered about 90 years ago. Apparently a seedling of wild Grape. It early established the record of being the Grape of the millions, "The King of the Grape Family."

LUCILE — Red

(Pictured above)

This new Grape is rapidly becoming the leading red variety of America. It ripens soon after Moore's Early. Berries are a lovely red with a yellow undertone, making them most attractive. A vigorous grower, hardy and very productive. Fine for home use, and a fine commercial Grape, because the flesh is solid and the berries do not crack; fine shipper.

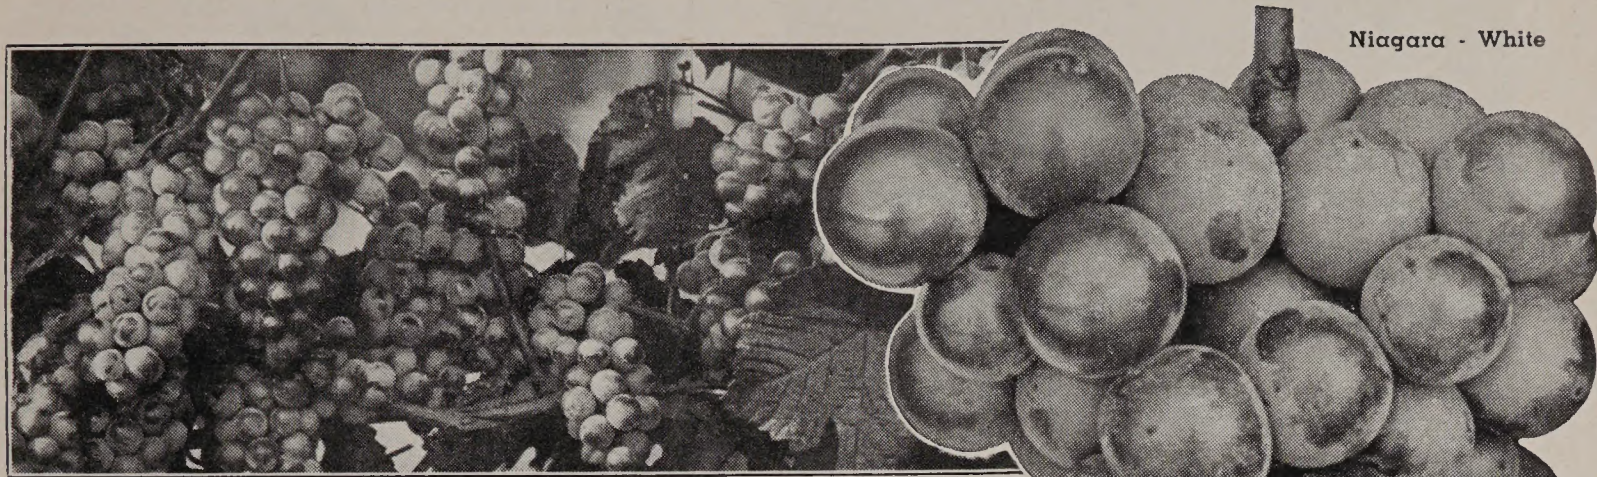

All-American Grape Collection

- 2—2 yr. No. 1 Niagara. White.
- 2—2 yr. No. 1 Concord. Blue-black.
- 2—2 yr. No. 1 Lucile. Red.

Grape Collection *Lucile, Niagara, Concord*

Actual Photo of Grapes Growing on an Arbor

NIAGARA A Favorite American Variety

Niagara is the leading American green Grape, holding the rank of among Grapes of this color that Concord does among the black varieties.

Since one of the parents of Niagara is Concord, and since the two Grapes are largely grown in the same region, and for the same general market, chiefly as table Grapes, we may best arrive at the status of Niagara by comparing it with Concord. Due to the tough leathery foliage, Niagara is especially immune to fungous diseases. Berries are large; bunches large and compact, color greenish yellow when fully ripe, sweet, juicy and delicious. The foxiness or perfume of Niagara is most marked just after the fruit is picked, and it is usually better flavored after having stood for a few days. The flavor is not at its best unless the Grape is fully ripe.

Winchell	Mich., Wis., Ohio, Mo., Penna., N. Y.	Medium late	8

Note.—While the varieties listed above will grow successfully in almost every Grape section, for the convenience of the amateur, we make these special recommendations.

A well cared for vineyard, such as the field of Concord shown above, is a lifetime source of pleasure, pride and profit. Give it the ordinary good care it deserves (proper pruning, frequent cultivation, ample soil fertility), and it will go right ahead indefinitely, yielding bumper crops year in and year out.

Five of one variety or ten of not over three varieties at 10 rates.

We propagate many other varieties of grapevines not listed in this catalog.

GROWING GRAPES *Cultural Directions*

GRAPE VINES should be planted where they will have the sunshine to grow the vine, and to properly ripen the berries, thus developing the sugar content of the fruit, as they respond beautifully to warmth.

No grounds are so small but that at least a few grape vines can be grown, permitting you to enjoy luscious home-grown grapes from your own planting.

The vines need little care, pruning is the greatest though not difficult. They may be trained for ornamental vine effect, a rear porch or veranda, or in the commercial vineyard.

Selection of Varieties

In making a choice of varieties one must consider the climate, length of season, the soil and location. In the extreme North where season is short and winter severe, the earliest and hardiest varieties succeed best. In general sections where the grape grows naturally, only the best varieties should be selected. For the market and the commercial growers the most profitable are preferred.

The most profitable in one location may be a different variety in other territories. For keeping quality and long hauls, tough skinned varieties should be selected. In sections where grapes mildew and rot, choose only the robust and healthy sorts. The best all-purpose varieties tested the country over include Agawam, Beta, Brighton, Concord, Delaware, Fredonia, Lucile, Niagara, Moore's Early.

In mild climates the following varieties do their best, Caco, Elvira, Lutie, Goethe. The following varieties do best south of the State of Pennsylvania: Barry, Gaertner, Wilder.

Planting

While commercial plantings are laid out in a different manner, the following suggestions will be most helpful for the home garden. Grape vines do best in well drained soil. When planting dig the hole large enough to receive roots without crowding, viz.: 18 to 24 inches wide, 12-15 inches deep. Place vine in center of hole and fill in with rich top soil, raising the vine until the crown is level with the ground. Add some good fertilizer such as rotted barnyard manure and then bone meal and cover level to the ground with soil.

If vines do not grow strong enough, cultivate better and trim close. If too strong, and fruit yield light, give vines more room, either by building trellis higher, or cutting out every second or third vine. Prune the remaining ones longer so as to cover the space.

REMEMBER THE FRUIT IS BORNE FROM BUDS ON LAST SEASON'S NEW CANES.

Pruning

Proper pruning is necessary for best quality fruit yields besides providing sufficient canes and no more to produce a good crop the following year. Insufficient pruning bears more fruit than the vine can properly make perfect. The result is they over-bear, often causing permanent injury. The fruit is often small, scraggly and late, and of poor quality, the canes fail to grow and ripen strong enough to bear next season's crop. By proper pruning, you concentrate the vigor of the vine into a smaller number of canes and clusters which it can "perfect." The berries and clusters grow large and ripen early, yielding a greater poundage of fruit of superior quality. Along with supplying strong well-ripened canes for next year's bearing.

How to Prune

The popular method of training and pruning are: No. 1, the fan; No. 2, Chautauqua; No. 3, Kniffen. Each of these methods is somewhat different. The fan method is used largely when vines are planted near barns and fences; select two or three new canes near the ground. These canes must be last year's growth, spread them out in a fan shape and fasten to barn or fence. Trim these two or three canes back, so that about thirty buds remain (thirty buds are right for a good healthy vine pruned by this method). The number of buds left on vine can be varied so as to give more than thirty if good and healthy and less if vines are weak.

The other methods are used where a wire trellis is required—especially when there are ten or more vines to a row. The trellis is set up as follows: use one inch angle iron or four to five inch wooden posts about seven to eight feet long. Drive posts into ground 18 to 24 inches. Posts should be placed every three vines (about 24 ft.). Use No. 9 steel wire fastening two lines to post. First wire two feet from ground and second wire 2½ ft. above lower wire.

The Chautauqua Pruning Method

Trim back the two canes, grown the first season; one to three buds, the other just long enough to tie up to bottom wire of trellis. During the second summer, twist one growing cane each way around the bottom wire, thus forming an arm each way. The third spring tie up three or four new canes from these arms (as the strength of vine will permit) to the top wire. These are your fruiting canes. Do this each year. It usually happens that the vine grows more new fruiting canes than are desired for the following year. Hence, some of these canes will have to be cut off close to the arms. It is a good practice to leave two or three spurs with two or three buds each in convenient places along these arms to produce new wood for the following year.

Do not let wood accumulate on these arms. Renew arms by using a young cane growing near the old stem, twisting it around the lower wire once and tying it up to top wire. The whole vine may be renewed in a similar manner, using a new cane, starting near the ground. Renewing old canes occasionally is a good practice.

The Single-Stem Four-Arm Kniffen Method

This is similar to the Chautauqua method by forming arms on bottom wire. The next year a new cane growing from below the lower wire or main stem is tied to top wire and two more arms are trained there. Each year all old wood is cut back as near to original stem as possible, new arms run out and are tied left and right on each wire. These fruiting arms should have six to eight buds each, depending on vigor of vine. One not accustomed to grape pruning may find it difficult to prune away so much new growth; you will be amply repaid by so doing with larger and better formed clusters.

Special Equipment

We welcome correspondence for special equipment of recent development covering special tools, viz.: cultivators, horse hoes, pruning and picking shearers, tying wire and baskets.

NEW GRAPES Try some of the magnificent new triumphs of horticulture. Many are far superior to older varieties.

LATHAM

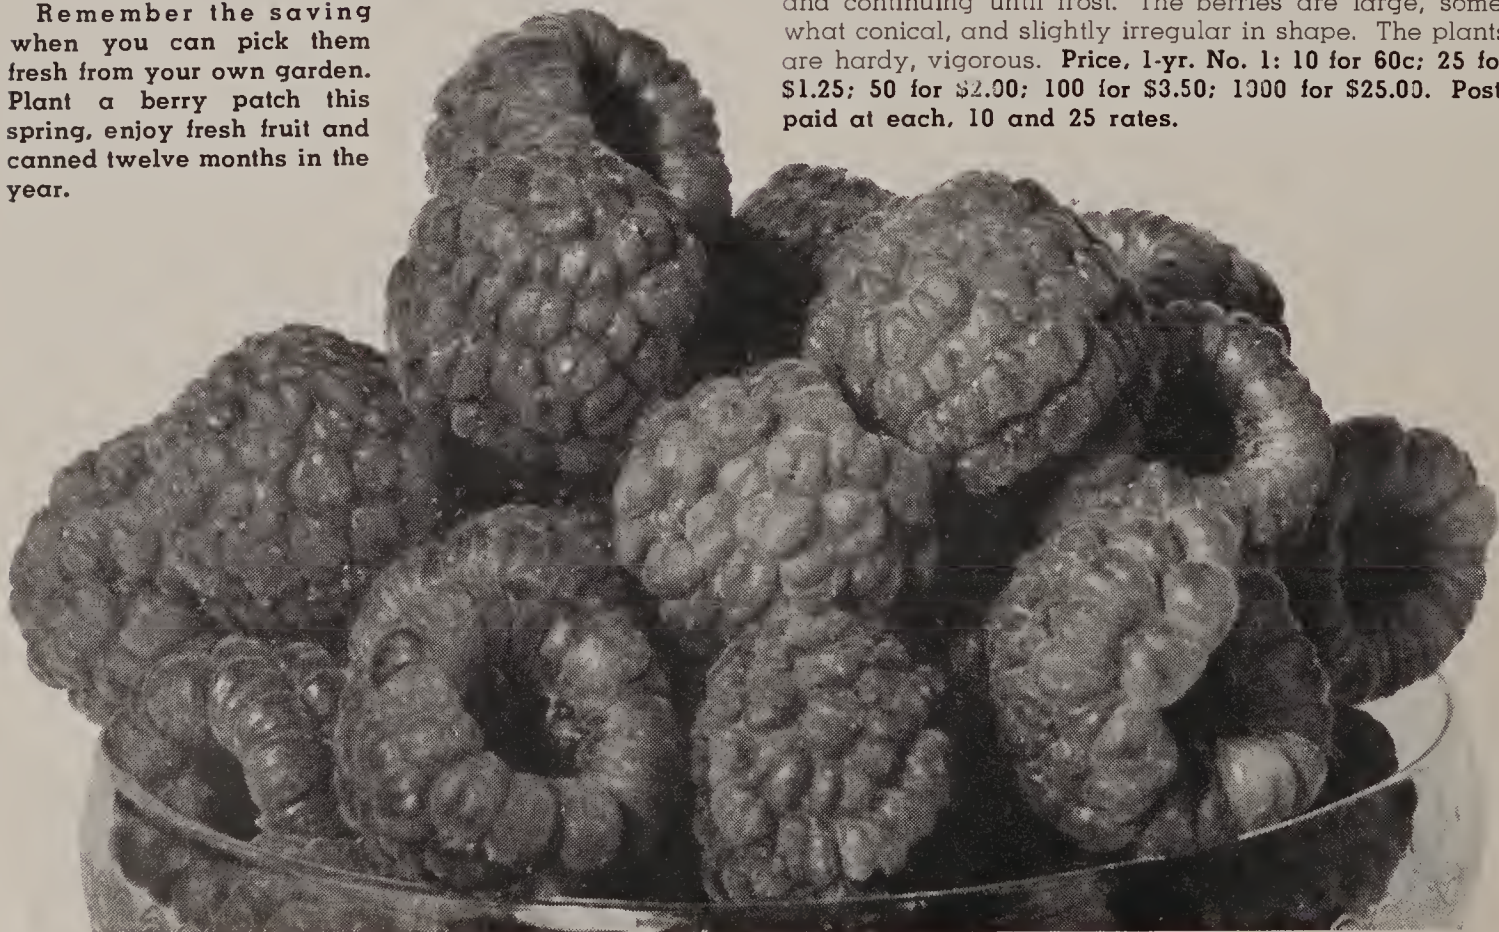

A Leading Commercial Variety Grown Extensively

The bushes of this remarkable Raspberry are rapid, vigorous growers, often reaching a height of six feet, the canes are strong and erect, frequently an inch or more in diameter. Fewer spines or thorns than other Raspberries. This makes berry picking comfortable. The Latham has been put to every known test. It has been grown under identical conditions in competition with practically all leading varieties in Raspberries. In every instance, it has out-distanced the field. It has even produced a profitable yield the first summer after planting. **Price: 10 for 35c; 25 for 75c; 100 for \$2.75; 1000 for \$15.00. All varieties postpaid at 10 and 25 rate.**

INDIAN SUMMER

Everbearing Red Raspberry

Here is the superior everbearing Red Raspberry. A new two-crop Red Raspberry developed by the New York Experimental Station. Bears in summer as other Raspberries, and also in fall, beginning in September and continuing until frost. The berries are large, somewhat conical, and slightly irregular in shape. The plants are hardy, vigorous. **Price, 1-yr. No. 1: 10 for 60c; 25 for \$1.25; 50 for \$2.00; 100 for \$3.50; 1000 for \$25.00. Postpaid at each, 10 and 25 rates.**

LATHAM—It thrives on every kind of soil, and produces bumper crops of fine berries regularly.

Raspberries

**TRUE TO NAME
FREE FROM DISEASE**

**West Hill Raspberries Are Easy to Grow,
Easy to Pick, and Easy to Sell**

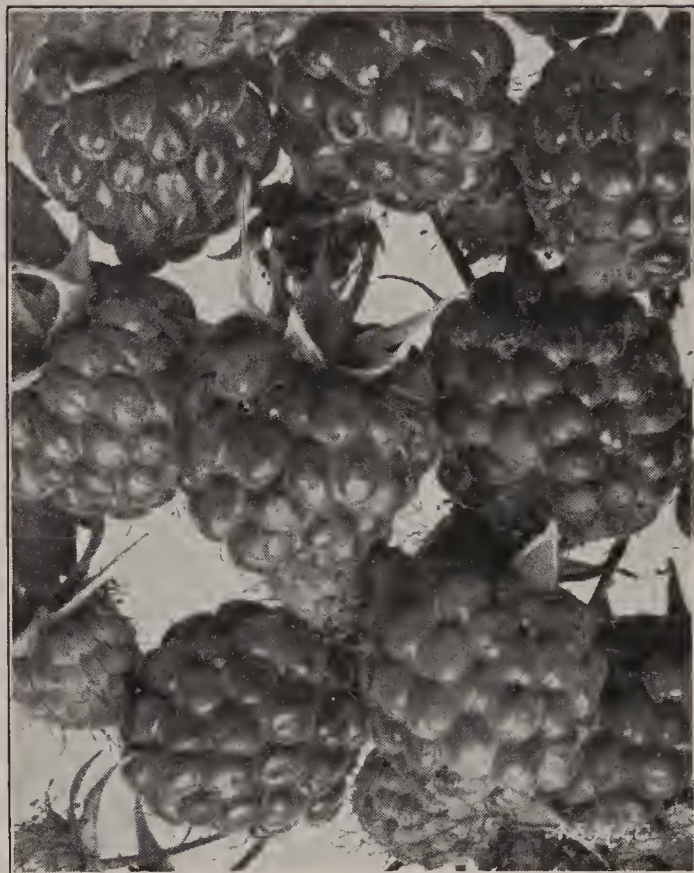

NEWBURGH

For several years this comparatively new variety has been tested and found a valuable new addition to the early Raspberries. The color is bright, vivid red and quality even better than Latham. Ripens one week before Latham and bears bumper crops. Our plants are vigorous and well branched, but do not grow quite as tall as most kinds. **Price: 10 for 50c; 25 for \$1.00; 50 for \$1.50; 100 for \$2.50; 1000 for \$16.00.**

TAYLOR

Before this new variety was put on the market it was tested by the New York Experimental Station some ten years. This variety ripens just after Latham, the berries are very large, firm, bright red color.

One hundred plants of Newburgh, Latham, and Taylor will give you fresh berries over a long season and be extremely profitable for you the next few years. **Price: 10 for 60c; 25 for \$1.00; 100 for \$3.00; 1000 for \$26.00.**

Newburgh - A Red Raspberry

2 Good Purple Raspberries COLUMBIAN

Dark Red or Purple

The most prolific Raspberry known and best for canning and drying. Although red, it never suckers as other varieties.

Price: 10 for 40c; 25 for 75c; 100 for \$2.50; 1000 for \$15.00.

SODUS

The New Purple Raspberry

Here is the new purple berry farmers and market gardeners have been waiting for. It is offered with the assurance that it is the most profitable and desirable purple Raspberry on the market. Its size, productiveness and hardiness entitle it to be called "The Business Purple Raspberry." The berries are fine and fine flavored and will not crumble, a feature desired by both canners and berry dealers. **Price: 10 for 60c; 25 for \$1.00; 100 for \$3.00; 1000 for \$26.00.**

Taylor
Red Raspberry

2 Fine Black Raspberries

CUMBERLAND

The largest Black Raspberries known, averaging 7/8-inch in diameter. Mid-season. **Price: 10 for 40c; 25 for 75c; 100 for \$2.50; 1000 for \$15.00.**

PLUM FARMER

Ripens early, exceptionally large, of great productiveness. **Price: 10 for 40c; 25 for 75c; 100 for \$2.50; 1000 for \$15.00.**

All Raspberry Varieties Postpaid at 10 and 25 Rate.

Blackberries - Boysenberries

ALFRED - The Coreless Early Blackberry

25 plants \$1.00

This new coreless Blackberry has never been known to winter kill in any section. Produces large, jet black, plump berries, many of them one and one-half to two inches long. Practically free from seed, coreless, sweet and juicy. Alfred ripens a week to ten days earlier than Eldorado, and produces a heavy crop of fruit. A healthy, vigorous grower, bears nearly a full crop the first year after planting. Absolutely hardy and withstands temperatures of 30 degrees below zero. A favorite Blackberry for serving fresh, canned or in pies.

BLOWERS

Originated here in the Chautauqua "Grape Belt" and is no doubt the most productive Blackberry known. 2,694 berries have grown on one bush, and 2,720 quarts on one-third acre. Of good size and quality. Jet black and a good shipper. Hardy.

ELDORADO

A good grower, healthy, very hardy and exceedingly productive. Berries are large, jet black and of best quality. Very reliable.

Alfred
The Master
Blackberry

LUCRETIA Dewberry

This Dewberry is very productive; of extra large size, will grow and thrive on very light soil and live for many years. To live in a locality where the thermometer registers 7 degrees below zero, you can prevent vines from winter killing by laying them down on the ground and covering with snow.

Prices: 10 for 45c; 100 for \$2.00; 1,000 for \$14.00.

Boysenberry
The Super Dewberry

The Mammoth Boysenberry

The Boysenberry is the prize of the fruit basket — a great big, plump, delightful flavored berry, full of rich juice, yet so firm and meaty that it is perfect for canning and preserving and particularly delicious fresh. This new Boysenberry averages two inches in length, about 40 to the quart box, is very hardy, quick grower, heavy yielder. Price 1st class 1-year plants, each 10c; 10 for 75c; 100 for \$5.00.

West Hill - Blueberries, Currants, Gooseberries

Blueberries DeLuxe

LUSCIOUS FRESH BERRIES FOR THE TABLE,
ORNAMENTAL SHRUBS for HOME GROUNDS

(See illustration on back cover)

As an ornamental shrub the Blueberry cannot be surpassed, full of lovely pink buds which open into bell-shaped white flowers in June. Leaves change in color from green to red late in fall, making a beautiful bush for ornamental planting. We offer three varieties growing in height from 3 ft. to 6 ft. or more. A few bushes planted in the shrub border or in the rear garden will be sufficient to supply you with berries throughout the season. For best results, Blueberries require acid soil and abundant moisture. If your soil is not acid, it may be made so by mixing with a little quantity of acid peat, rotted leaves, pine needles, sawdust or similar material.

CABOT. Plant seldom exceeds 3 ft. in height, makes a broad low bush. Early.

RUBEL. Mid-season. Bushes develop to a height of six feet or more. Stems are slender, the young wood is a rich red, the berries are fine color. The Rubel is the best pollenizer and should be planted with Cabot and Pioneer.

PIONEER. Mid-season. The bushes are stocky, seldom exceeds four feet in height, stems are stiff and straight, the berries are very blue colored and of fine flavor.

Buy in sets of three for best fruiting results.

PRICES: 2-yr.-old, 12-16 inches, each \$1.00;

3 for \$2.50. Above plants are furnished with ball of earth wrapped with burlap.

✓ CURRANTS

West Hill—Headquarters for the Finest Currants Grown

CHERRY. Bright red, vigorous and productive. One of the very best. **Price:** 1-yr. No. 1 plants, 9c each; 10 for 70c; 100 for \$5.00. 2-yr. No. 1 plants, 12c each; 10 for 90c; 100 for \$7.00.

DIPLOMA. Red Currant of good quality; very mild. One of the largest in both bunch and berry. **Price:** 1-yr. No. 1 plants, 9c each; 10 for 70c; 100 for \$5.00. 2-yr. No. 1 plants, 12c each; 10 for 90c; 100 for \$7.00.

FAY'S PROLIFIC. Red. Berries uniform, with large stems and fruit less acid. A favorite for both home and market. **Price:** 1-yr. No. 1 plants, 9c each; 10 for 70c; 100 for \$5.00. 2-yr. No. 1 plants, 12c each; 10 for 90c; 100 for \$7.00.

PERFECTION. Red. Berry very large, clusters long, sparkling red; a great bearer. Ripens with Fay's but is much hardier. **Price:** 1-yr. No. 1 plants, 9c each; 10 for 70c; 100 for \$5.00. 2-yr. No. 1 plants, 12c each; 10 for 90c; 100 for \$7.00.

RED CROSS. A good red Currant, mild flavor, long clusters. Vigorous and very productive. **Price:** 1-yr. No. 1 plants, 7c each; 10 for 60c; 100 for \$4.50. 2-yr. No. 1 plants, 9c each; 10 for 80c; 100 for \$6.00.

RED LAKE. Ripens mid-season, berries red, unusually large, recommended for home and commercial use. **Price:** 2-yr. No. 1 plants, 15c each; 10 for \$1.25; 100 for \$10.00. 1-yr. No. 1 plants, 12c each; 10 for \$1.00; 100 for \$8.00.

WHITE GRAPE. A popular white Currant, heavy bearer, large clusters, good size fruit, mild flavor. **Price:** 1-yr. No. 1 plants, 9c each; 10 for 70c; 100 for \$5.00. 2-yr. No. 1 plants, 12c each; 10 for 90c; 100 for \$7.00.

WILDER. One of the largest red Currants known, and of good quality; mild sub-acid. The bush is a strong vigorous grower and holds its foliage and fruit until very late. **Price:** 1-yr. No. 1 plants, 7c each; 10 for 60c; 100 for \$4.50. 2-yr. No. 1 plants, 9c each; 10 for 80c; 100 for \$6.00.

Blueberries grow in bunches as shown on this lovely decorative shrub.

✓ GOOSEBERRIES

CHAUTAUQUA. A very vigorous, stout, stiff, upright grower and exceedingly productive. Should not be planted closer than 4 by 6 ft. apart. Fruit light yellow, free from spines and down, veined and translucent, averaging in size 1 to 1¼ inches in diameter. Thick skinned, very sweet.

Price: 1-yr. No. 1 - 30c each; 10 for \$2.50.

2-yr. No. 1 - 40c each; 10 for \$3.50.

DOWNING. The largest of the American varieties. Whitish green, good quality. Bush strong, stout, upright grower and prolific.

JOSSELYN. A vigorous, upright growing bush, healthy and productive. Fruit light red, about size of Downing.

POORMAN. Red. New. Of large size and excellent quality. Bush strong and healthy. Very productive.

Prices of All Varieties

Except as noted.

1-yr. No. 1 plants, 12c each; 10 for \$1.00; 100 for \$8.00

2-yr. No. 1 plants, 15c each; 10 for 1.25; 100 for 10.00

By mail, postpaid at single and ten rates.

Revised rules and regulations of the Federal Horticultural Board now permit us to ship Currants and Gooseberries practically anywhere in the United States. Shipping date limited to May 15th.

FAVORITE STRAWBERRIES for HOME and MARKET

BLAKEMORE

A New Delicious Berry

Blakemore is a comparatively new berry, originated by the U. S. Dept. of Agriculture—berries are very firm with a tough skin that makes them good shippers, a bright red color that does not alter in picking or preserving—flavor slightly tart. One of the most popular June bearing varieties. It is a heavy bearer and a berry that holds up inside. **Prices: 25 for 25c; 100 for 90c; 1000 for \$6.00.**

DORSETT

One of the Finest Berries Grown

Similar to Fairfax, but ripens a brighter red. Dorsett was introduced in 1933 by the U. S. Dept. of Agriculture. A beautiful bright sparkling berry with a high average of fancy fruit of rare and delicious quality in all tests. Is very firm and solid and will ship long distances. Under near drought conditions it produced at the rate of 6,640 quarts per acre with 85% rating good capacity. **Prices: 25 for 25c; 100 for 90c; 1000 for \$6.00.**

FAIRFAX

Best for Heavy Yields

The biggest and sweetest Strawberry grown today is the Fairfax. Because of its tremendous productiveness, rich flavor and huge size—all tests average 90% fancy—it is causing a sensation whenever planted. The large bushy plants have twelve stout stems, loaded with luscious berries, when picked they are bright red—when dead ripe, they are a glossy dark red, maintaining their firmness and fine flavor. **Prices: 25 for 25c; 100 for 90c; 1000 for \$6.00.**

PREMIER

Ripens Very Early

Introduced in 1915, Premier swept the country. It has made more money for its growers than any other berry on the market, and still continues to find favor as a main crop variety, always salable, always dependable. Berries are medium to large, very plump and well formed, bright red with an unusual green crown. Premier is exceptionally hardy and very resistant to drought, making a splendid early berry for any garden. **Prices: 25 for 25c; 100 for 90c; 1000 for \$6.00.**

Dorsett, Rich and Luscious

MASTODON Everbearing

Bears From August Till Frost

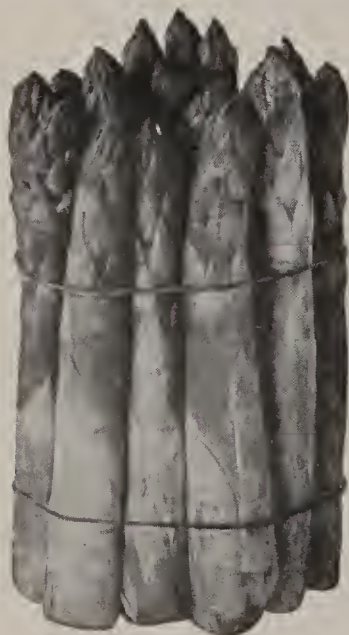

Stands head and shoulders above every other Everbearing Strawberry. Its great bright red berries are so much larger, firmer, and better looking when boxed for selling that the market demand for this excellent berry exceeds that of all other everbearers combined. Plants are exceptionally strong and vigorous, berries are large, firm body, a rich glossy red and of a marvelous flavor. Whether for home or market use, Mastodon is a wise choice. **Prices: 10 for 30c; 25 for 45c; 100 for \$1.50; 1000 for \$10.00. Postpaid at 10, 25 and 100 rate.**

Mary Washington Asparagus - *The Best*

America's Finest

Long Lived

Tender Shoots

Mary Washington

Mary Washington is accepted by commercial growers as the very best type—hardy, long lived and a heavy producer of tall, straight, tender shoots. Choose West Hill large, well developed two-year roots and you save a whole year. They could be cut the second season but not advisable.

This variety is a creation of the U. S. Dept. of Agriculture, Washington, D. C., with the object of eliminating rust. A very valuable feature. **Prices: 2-year, 10 for 25c; 25 for 50c; 100 for \$1.25; 1000 for \$8.00. Postpaid at 10 and 25 rate.**

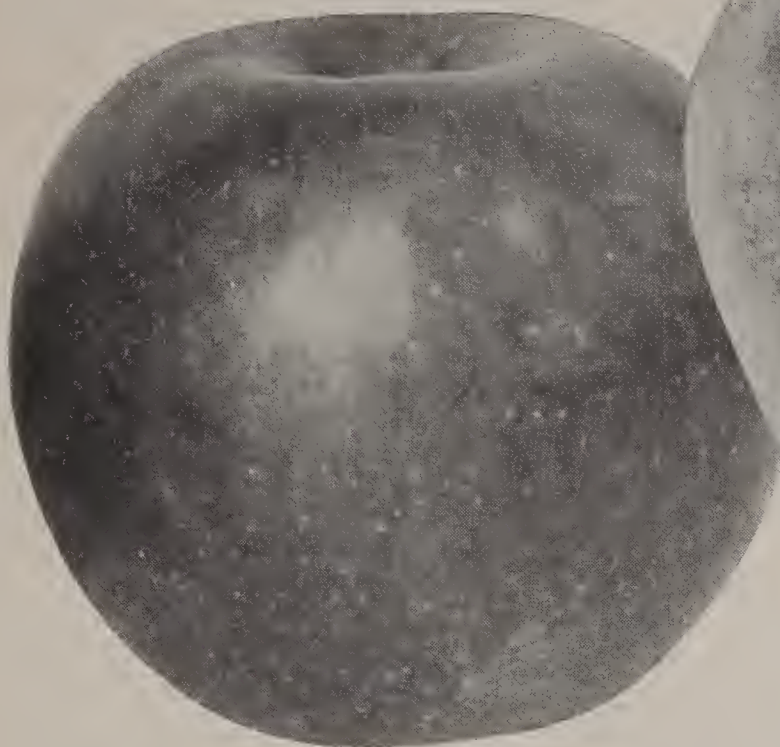

RHUBARB or PIEPLANT

The first thing in spring to furnish material for pie and sauce. Also very desirable for canning, and should be in every garden. Plant three or four feet apart and make the soil rich. The richer the soil, the earlier, larger and better the stalks will be. **Price: Strong, 2-year roots, each 10c; 10 for 75c; 100 for \$5.50.**

Summer Apples

RED ASTRACHAN. Large and handsome, crimson, rather acid. A good grower, very hardy. August.

SWEET BOUGH. Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Autumn Apples

OLDENBURG. Large, striped; tender, juicy, sub-acid, a good grower, regular and free bearer. September and October.

Winter Apples

BALDWIN. The old reliable has earned its long popularity. Big bright red apples of incomparably good flavor. Productive and profitable. December to March.

CORTLAND. A beautiful red apple. Larger than McIntosh, claimed better quality and matures a month later. Developed by the New York State Experiment Station. It has inherited only the good qualities of its parents, McIntosh and Ben Davis, with some additional good qualities of its own. Very firm and keeps late in winter.

McINTOSH. A choice variety, large and beautiful. Deep crimson and of the highest quality. Fruit above medium to large, flesh snow-white, crisp and very tender. Tree vigorous, with spreading head. Hardy and a good regular bearer. November to January.

NORTHERN SPY. Large, striped red, quality excellent; free grower, productive. December to June.

RED DELICIOUS. A super-strain variety. Brilliant crimson-red. Earliest red-coloring apple known. The fruit can be picked while still firm, keeps better in storage. Packs attractively because of uniformity in size. Ideal for home or commercial orchards.

STAYMAN WINESAP. Superior double-red apple, crisp, juicy, sprightly, aromatic. Vigorous, hardy; early and reliable annual bearer. December to April.

✓ Crab Apples For the Little Orchard

HYSLOP. Large, deep crimson; very popular, excellent for Crab Apple jell. October to January.

TRANSCENDENT. A beautiful variety of the Siberian Crab; red and yellow; very handsome; a remarkable grower and bearer. September and October.

Super Sized, Big 6 to 8 ft. Apple Trees—\$1.25 Each

Super Size fruit trees for this spring. No waiting for little trees to develop. Now you can get strong, sturdy, 6 to 8 ft. big trees. Ready to transplant and grow in a new location.

V Peaches

EARLY - MIDSEASON - LATE
For Every Taste and Use

HALE-HAVEN

Prices of Peach Trees

	Each	10
4 to 5 ft., first class	\$0.30	\$2.50
Medium, 3 to 4 ft.25	2.00
Extra heavy, 5 to 7 ft.45	3.50

Five of one variety or ten of not over three varieties at 10 rates.

EARLY CRAWFORD. Very large, yellow and red. Best quality; very beautiful and popular; productive; free. Early September.

ELBERTA

Fifty per cent of all Peaches planted are Elberta. It grows well everywhere, yielding big profitable crops of fine yellow freestone fruit. Firm flesh is juicy and well flavored, fine for canning—a West Hill recommendation.

GOLDEN JUBILEE

The season's first yellow freestone. A new Peach, now well out of the development stage. Blooms late—after danger of frost; it is hardy, grows and produces well all over the country. A beautiful Peach with a strong and appealing color.

J. H. HALE. The only truly "fuzz"-free Peach. One-third to one-half larger than Elberta; smooth, bright crimson, wonderfully rich in flavor. A popular "fancy" market Peach. Plant with other kinds for pollenization.

Another find of the South Haven Experimental Station. Ripens with South Haven but is a better commercial sort. A little better color and better for distance shipping. Elberta type, yellow flesh, freestone, well colored. Ripens early September. A West Hill recommendation.

ROCHESTER. This good Peach originated near Rochester, N. Y., (a Crawford type). However, it ripens one week before Early Crawford, is more prolific, hardier, larger, prettier, and equal in quality. Skin is thick and tough, which makes it a good shipper. Well adapted for both home use and market. Freestone. September 1st.

SOUTH HAVEN. Between Golden Jubilee and Elberta comes this new Peach. Developed by South Haven Experimental Station. (Elberta type.) But, ripens 15 to 20 days earlier. This variety ripens its entire crop in about ten days, making it very profitable commercially. Yellow flesh, freestone, well colored and rich in flavor.

VEDETTE. A Canadian introduction of great merit. Hardy, large, roundish oval, yellow fleshed and a freestone. Ripens about 3 weeks before Elberta and is superior to it not only in quality but in color as well.

WILMA. A new Peach of merit. The fruit is as large as Elberta, its parent, but not quite so elongated; ripens about ten days later.

*Extra Large
Peach Trees*

Every one of these Peach trees, heavily branched, extra well rooted. The cream of the crop. Shipped by Express or Freight only. They are too large for Parcel Post. Extra heavy, 5 to 7 ft. trees, each, 65c.

West Hill Superior PEAR TREES

Select Two-Year Specimens
Best for Home Orchards

Pear trees grow wherever Apples succeed. They are particularly adaptable for the small garden because they thrive in sod, and so may be planted right in the lawn. They prefer heavy clay and heavy clay loam. Here their growth is somewhat slow but they are more resistant to blight.

Prices of two-year-old Standard Pears:	Each	10
No. 1, 5 to 7 ft.	\$0.65	\$6.00
Medium, 4 to 5 ft.60	5.00
Extra heavy, 6 to 8 ft.85	

Five of one variety or ten of not over three varieties at 10 rate.

BARTLETT. In most sections Bartlett always will be the favorite—an old reliable Pear of exceptionally fine flavor. It flourishes everywhere except in the far north regions, growing those big characteristically yellow Pears, flushed rosy on the "sun side"—very juicy and rich in flavor. New fruits are so meltingly delicious just fresh from the tree. Ripens in September.

BOSC. New. Of the very highest flavor and quality. A distinct addition to our list of Pears. Large and of a beautiful golden russet color. Flesh fine grained, juicy and melting. Ripens early October.

CLAPP'S FAVORITE. Much like the Bartlett, of which it is a seedling, but larger and a little earlier. Vigorous, of fine quality but neither keeps nor carries well. August.

The popular
Bartlett Pear

Kieffer
An excellent shipper

Dwarf tree takes little space and yields full size fruit.

FLEMISH. Large, beautiful, yellow and russet; juicy, melting, sweet and good. Great bearer, reliable. September and October.

KIEFFER. Large, rich golden yellow with red cheek. Very vigorous, healthy, hardy; early, regular, abundant bearer. Best for canning. Remarkable for keeping and shipping. Very profitable. October and November.

LAWRENCE. Medium, yellow with brown dots; melting, pleasant, aromatic. November and December.

SECKEL. Small, yellowish brown, sweet, of highest flavor and quality. Good grower and productive. September and October.

SHELDON. Large, apple-shaped, green and russet. Sweet, juicy and highly perfumed. Best quality. Vigorous, hardy, productive. October.

WORDEN. A seedling of the Seckel but several times as large and superior in beauty and keeping quality. Very sweet, juicy and fine grained. It has the peculiar aroma of its parent. October.

Dwarf Trees

In addition to our standard varieties we have available an excellent assortment of dwarf-growing trees in many varieties.

These trees are especially adapted for limited spaces and small yards. They grow about 10 to 15 feet high and bear standard size fruit.

Prices: 4 to 5 ft., 2-year-old, 65c each; 10 for \$6.00.

Plant Standards About 18 to 20 Feet Apart Each Way, Dwarfs 10 to 12 Feet

The Large Montmorency

WEST HILL BEST *Cherry Trees*

Cherry trees like well-drained soil. Sour Cherries are most adaptable but Sweet Cherries ask deep, dry, sandy or gravelly loam, and a little extra care in spraying. Set 30 to 40 feet apart, either in the spring or fall.

SOUR—the Pie Cherries Supreme

Prices:	Each	10
No. 1, 5 to 7 ft.	\$0.65	\$5.50
Medium, 4 to 5 ft.60	4.50
Extra heavy, 6 to 8 ft.95	

Five of one variety or ten of not over three varieties at 10 rates.

LARGE MONTMORENCY. Fruit growers consider this the finest Sour Cherry in cultivation. It is strong, well formed and bears good crops with dependable regularity. The fruit is large, dark red, firm, with a distinctive acid flavor, delightful in pies and preserves. If you can have but one Cherry tree, plant a Montmorency.

MORELLO. A large, dark red, sub-acid Cherry. Bears end of July.

RICHMOND. Medium size, red, quite acid; hardy, healthy, very early and productive. A popular Sour Cherry ripening in June.

SWEETS - A Treat to Eat Fresh

Prices:	Each	10
No. 1, 5 to 7 ft.	\$0.70	\$6.00
Medium, 3 to 4 ft.65	5.00
Extra heavy, 6 to 8 ft.	1.00	

Five of one variety or ten of not over three varieties at 10 rate.

NAPOLEON. A very choice sweet variety, pale yellow and red; excellent for eating and market. Ripens middle of June.

SCHMIDT. Very large, jet black, very juicy, sweet and of fine flavor. An excellent shipper and very profitable. Tree is hardy and a strong, healthy grower.

SPANISH. Pale yellow with red cheek; juicy and very large. Ripens end of June.

TARTARIAN. The best Black Sweet Cherry known. Large, juicy, rich and productive. Excellent for table use and canning. A consistent bearer; ripens end of June.

WINDSOR. Large and attractive; flesh hard, meaty, and pleasing to the taste. Fine for table and market, very popular; ripens end of July.

WOOD. A large, good looking, delicious Cherry. Yellowish white in color with crimson cheek. Flesh firm, tender, mild and sweet.

A new low-growing, easy-to-pick fruit ~

HANSEN'S BUSH CHERRY

These striking, low growing, ornamental Bush Cherries are a real novelty in the home garden. Not only are the bushes very ornamental but the fruit resembles a plum in size and shape. They come massed in clusters, at times almost completely covering the limbs. They are very easy to grow and hardy everywhere. Good to eat fresh, delicious preserved. Bear from the ground up. Excellent for hedges, ornamental shrubs or limited spaces. Start bearing next year. Prices: 50c each; 3 for \$1.25; 10 for \$4.00.

It Pays to Buy Direct From West Hill Nurseries, Fredonia, N. Y.

Abundance Plum

Plum and Prune Trees FOR QUICK and HEAVY YIELDS

Prices of two-year-old Plum trees on plum roots:		Each	10
No. 1, 5 to 7 ft.		\$0.65	\$6.00
Medium, 4 to 5 ft.55	5.00
Extra heavy, 6 to 8 ft.90	

Five of one variety or ten of not over three varieties at 10 rate.

ORIENTAL PLUMS

ABUNDANCE. Large and early; of a beautiful bright cherry color. One of the finest and handsomest growers. Very hardy. An early and abundant bearer. Middle of August.

BURBANK. An abundant and early bearer. Fruit averages slightly larger than the Abundance. Some two weeks later; large, clear cherry-red. Flesh a deep yellow with sweet, aromatic flavor. One of the best and most profitable. Late August.

(Make sure of your favorite Plums each
year by planting these five West Hill
big, healthy, hardy trees.)

APRICOTS

The Apricot is the most delicious of all fruits. It requires the same kind of soil and treatment as the Peach.

Only the hardiest varieties are offered below. Plant 15 feet apart each way.

Price: 4 to 5 ft., first class, 60c each.

HARRIS. The largest and hardiest Apricot known. Largely grown in New York State with success. Prolific and profitable. Ripens middle of July.

MOORPARK. One of the largest. Orange with red cheek. Of rich flavor and very productive.

EUROPEAN PLUMS

BRADSHAW. Very large, purple, juicy, vigorous and productive. Sweet and aromatic. Ripens August.

GERMAN PRUNE. Medium, oval, blue. Rich and sweet; productive and popular. Ripens September.

IMPERIAL. (Imperial Gage.) Large, greenish, juicy and rich. Very vigorous and productive. Ripens August.

ITALIAN PRUNE. (Fellenburg.) Large, oval, purple, juicy and delicious; very productive. Fine for drying. Ripens September.

LOMBARD. Fruit is medium, dull brick color, sweet. A great bearer; valuable market variety. Ripens August.

REINE CLAUDE. Very large, greenish, good; vigorous and productive. Ripens September.

SHROPSHIRE DAMSON. Medium, dark purple. The best of the Damsons. Excellent for preserving. Ripens October.

QUINCES

3 to 4 ft., first class, 55c each; 10 for \$5.00.

ORANGE. Excellent for jelly and preserves. Fruit large, bright yellow, excellent flavor. Very productive. Ripens October.

West Hill~ SWEET CHESTNUTS by the Pailful

PICKED FROM THE
NEW CHESTNUT TREES

Supply Limited

Where are the Chestnuts of yesterday? What has happened to them! This is a question many home owners have asked us frequently. Over a period of many years Chestnuts have been practically eliminated by a devastating disease from large sections of the country. With a new blight-resistant variety West Hill offers in limited quantities a new Chinese Chestnut, which is dwarf in habit and bears quality nuts the same size as the American Chestnut at a very early age. This tree makes an excellent ornamental specimen if grown on good soil. Undernourished, poor soil often

Actual photograph of a young Chestnut Tree bearing edible Chestnuts

starts blight and care should be taken to guard against it. The new Chinese Chestnut transplants best in the seedling stage. **Prices:** 1-yr. seedlings, 12 to 15 in., 40c each; 3 for \$1.10; 10 for \$3.00.

BUTTERNUT—FILBERTS—HICKORY—PECAN WALNUT TREES

Besides supplying good Hickory and Walnut timber—these fine trees offer friendly shade in the summer and a profitable investment in their yearly harvest of edible nuts.

HICKORY

SHELLBARK. The best flavored nut. Also a fine shade and valuable timber tree. 4 to 5 ft., each, \$2.50.

PECAN

BUDDED. These nuts have much improved in late years and we now offer them budded on strong seedling roots. A native of Southern States but hardy in the North also. 2 to 3 ft., each, \$1.00.

FILBERTS

ENGLISH. A shrub growing 6 to 8 feet high. Entirely hardy. Succeeds on almost any soil and bears early and abundantly. Larger and better than the native American variety. One of the most profitable nuts to grow. 2 to 3 ft., each, 70c; 10 for \$6.00.

✓ WALNUTS

BLACK. A lofty, rapid growing, native tree. Valuable for its nuts and timber. Very durable; largely used in the manufacture of furniture and cabinet ware. 5 to 7 ft., each, 80c; 10 for \$7.00.

HARDY ENGLISH. This is a strain of Walnuts but much hardier than the English. It survived a cold snap that killed Peach trees and Grape vines in this vicinity. It usually begins to bear when four or five years old. It is of large size, thin-shelled and of excellent quality; in fact, equal to the best. 3 to 4 ft., each, \$1.25.

WHITE or BUTTERNUT. A handsome native tree, valuable for shade and timber as well as its nuts. 4 to 5 ft., each, 75c; 10 for \$8.00.

JAPAN (Sieboldiana). Perfectly hardy. One of the handsomest and most stately of ornamental trees. Leaves are immense. Bears young and abundantly. 4 to 5 ft., each, 75c; 10 for \$8.00.

California Privet

BARBERRY

Barberry is an everchanging pageant of color. Choose this as a background of taller, darker growth. It may be cropped close to 1½ to 2 ft. height, or allowed to run rampant, a bushy hedge rich in close-growing foliage. West Hill Barberries are all root free, healthy and reliable. Intertwining branches afford real protection. Thun-

bergi is the perfect choice. It forms a compact impenetrable barrier, a wall of deep rich glossy foliage which retains its color far into the fall. **Price: 12 to 18 in., 20c each; \$1.50 per 10; \$10.00 per 100. 18 to 24 in., 25c each; \$1.75 per 10; \$12.00 per 100.**

RED-LEAVED. See page 24.

HONEY LOCUST

Makes a strong thorny hedge for enclosing horses and cattle. Foliage very pretty and graceful.

Price: 1-yr. plants, 100, \$2.50; 1000, \$20.00. 2-yr. plants, 100, \$3.00; 1000, \$25.00.

OSAGE ORANGE

Farmers attention! Grows still stronger and makes a hedge "horse high, bull strong and pig tight."

Price: 2-yr. plants, 100, \$3.50; 1000, \$30.00.

THE PRIVETS

AMOR RIVER NORTH. This is the hardiest of all Privets, the one to choose for locations north of Philadelphia, Cincinnati and Denver. Similar in type to the well-known California Privet, except that leaves are a little less glossy. **Price: 18 to 24 in., \$2.00 per 25; \$6.00 per 100. 2 to 3 ft., \$2.20 for 25; \$7.00 per 100.**

CALIFORNIA PRIVET. Most popular and usable of all the hedge plants. Its foliage is deep green and very glossy, a close, uniform, even growth that shears most satisfactorily. **18 to 24 in., \$1.00 per 25; \$3.00 per 100. 2 to 3 ft., \$1.50 per 25; \$5.00 per 100.**

A good hedge eliminates the need of costly wood, iron, or wire fences, and gives you permanent satisfaction.

Hardy Climbing **VINES** *to Mantle Walls*

They provide shade for porches, pergolas, arbors, as screens they provide privacy, as wall covering they lend a dignity and homelike, permanent atmosphere to a place, such as mere coats of paint can never give.

BOSTON IVY

Clings closely to smoothest surfaces. Dark green leaves, overlap like shingles; turns yellow-scarlet in fall. **Price: 2 yr., each, 30c; 10 for \$2.50.**

CLEMATIS

JACKMANI. The flowers are four to six inches in diameter. Rich purple, with a velvety appearance. Blooms profusely and continuously from July until frost. **Prices: 2 yr., each, 50c; 3 for \$1.40.**

MME. EDOUARD ANDRE. Bright velvety red. A little smaller than Jackmani, but free bloomer. **Price: 2 yr., each, 50c; 3 for \$1.40.**

PANICULATA. The flowers are small, white, fragrant, produced in great panicles. Very popular. **2 yr., each, 40c; 3 for \$1.10.**

DUTCHMAN'S PIPE

Mammoth heart-shaped overlapping leaves with yellow pipe-like flowers, rapid growing and hardy. **Price: 2 yr., each, \$1.00.**

EUONYMUS RADICANS

(Bittersweet)

Bright green foliage, clusters of orange berries in the fall. Very pretty; 12 to 18 inches high. **Prices: 50c each.**

THE HONEYSUCKLES (Climbing)

HALL'S JAPAN HONEYSUCKLE. Fragrant, white and yellow flowers all summer, leaves almost evergreen. **Prices: 2 yr., each, 25c; 3 for 60c.**

MONTHLY FRAGRANT. Blooms all summer. Very fragrant. Colors red and yellow. **Price: 2 yr., each, 35c.**

SCARLET TRUMPET. A rapid grower, producing clusters of scarlet, trumpet-shaped flowers. **Price: 2 yr., each, 35c.**

SILVER LACE VINE

(Polygonum Auberti)

Late summer and fall it is an extravagance of foamy sprays of silvery blossoms. **Price: 35c each; 3 for 75c.**

WISTERIA, PURPLE

Dense drooping clusters of pea-shape purple flowers borne in great profusion. **Price: 2 yr., each, 30c; 3 for 75c.**

It Pays To Buy Direct From West Hill Nurseries, Fredonia, N. Y.

West Hill Stately Trees

JAPANESE FLOWERING CHERRIES

KWANZAN. These little Cherry trees grow briskly upright, but spread their branches if given room. Early spring before other foliage appears, they burst into a glory of pink bloom, double flowers that linger for a fortnight. Grows to 15 feet. **Price: 4 to 5 ft., \$1.50 each.**

BECHTEL'S FLOWERING CRAB

Quite the nicest of these delightful spring-blossoming trees. From mid-May to early June, a pompon of pink—great double flowers delightfully fragrant, almost like small Roses. **3 to 4 ft., each, 85c.**

DOGWOOD

WHITE FLOWERING. A small native tree, producing pure white flowers 3 to 3½ inches in diameter, early in spring before the leaves appear. Very showy. **3 to 4 ft., each, 75c.**

RED FLOWERING. Similar to the above except that the flowers are a deep, rosy pink color. Especially attractive. **3 to 4 ft., \$2.50 each.**

ELM, AMERICAN

The most majestic of all shade trees, hardy, drought resistant, quick to grow and long lived. Grows 100 to 120 feet tall. **Price: 8 to 10 ft., each, \$1.50.**

HORSE-CHESTNUT

(White Flowering)

This is a well-known tree of symmetrical form, dense habit, dark green foliage, producing long spikes of white flowers abundantly in early spring. **5 to 7 ft., each, \$1.75.**

JUDAS TREE

(Redbud)

While winter still lingers in secluded corners of the garden, the Redbud bursts into a misty veil of deep reddish pink. The little tree is picturesquely irregular in form, with leaves of perfect heart shape. Grows 12 to 15 feet tall. **3 to 4 ft., 75c each.**

LABURNUM, SCOTCH

(Golden Chain)

A small tree with smooth, shining leaves and long, drooping racemes of showy yellow flowers. Very ornamental. **3 to 4 ft., \$1.25 each.**

Flowering Dogwood

AILANTHUS

(Tree of Heaven)

Rapid grower; often 4 to 6 feet in a single season. The leaves give the effect of palm leaves. Makes a dense growth, thus producing much shade even when trees are young. Grows anywhere, even on city lots exposed to gas and smoke. **6 to 8 ft., \$1.00 each.**

CATALPA

BUNGEI (Umbrella Catalpa). Symmetrical, umbrella-shaped head tree. Leaves are large, heart shaped; very hardy, succeeds everywhere. Excellent when used in pairs as center entrance planting or along the driveway. **Price: 6 to 8 ft., 2-yr. heads, each, \$1.00; 2 for \$1.50.**

SPECIOSA. A rapid-growing park, street or forest tree. Bears large, luxuriant, heart-shaped foliage and clusters of flowers similar to the horse-chestnut but larger. Ornamental as well as useful. Hardy. **Price: 5 to 6 ft., each, 50c.**

Japanese Flowering Cherries

Ornamental • Flowering • Weeping

LINDEN

AMERICAN (Basswood). A rapid growing, beautiful native tree, with large leaves and fragrant flowers, rich in honey. 6 to 8 ft., \$1.50.

EUROPEAN (Lime Tree). A large, upright, pyramidal tree. Excellent for street or park. 6 to 8 ft., \$1.50 each.

MAGNOLIA

SOULANGEANA. A popular shrub or tree with very large white flowers, more or less purplish outside and often fragrant. The general effect is a ruddy pink, blooms in April. Our trees come with a ball of earth on the roots. 3 to 4 ft., each, \$3.00.

MAIDEN HAIR TREE

SALISBURIA. A singular, cone-bearing tree from Japan with almost fern-like foliage. Unlike any other tree. Very effective as lawn specimen. 5 to 7 ft., each, \$2.50.

THE MAPLES

NORWAY (Hard Maple). Finest, fastest growing hard maple. Symmetrical rounded head, densely covered with luxurious foliage. Scarlet and red in autumn. A good city tree. 8 to 10 ft., \$1.75.

SCHWEDLER'S PURPLE LEAVED. Color contrast all season. Foliage a gleaming red and purple. Mid-summer a purplish-green, autumn golden yellow. 6 to 8 ft., each, \$2.00.

SILVER-LEAVED. Common Soft Maple. Beautiful shaped tree of very fast growth. Luxuriant silvery foliage. 10 to 12 ft., each, \$1.50.

SUGAR (Rock Maple). A splendid hard Maple for lawn or city streets. Dense, bright green foliage, glorious colors in fall. Grows 100 to 120 ft. tall. 8 to 10 ft., each, \$1.50.

WIER'S CUT-LEAVED. A Silver Maple with remarkable and beautiful dissected foliage. A rapid grower, shoots slender and drooping, giving it a very graceful appearance. 6 to 8 ft., each, \$1.25.

MOUNTAIN ASH

EUROPEAN. A fine, hardy tree. The head is dense and regular, covered in June with a mass of white flowers, later with yellow berries, which turn into bright scarlet and last long into winter. Very beautiful. 6 to 8 ft., each, \$1.25.

Magnolia Soulangeana

PLANE

ORIENTAL (Sycamore). A large and elegant street or park tree, bearing luxuriant leaves of the shape of the grape leaf. Bark very light green, trunk mottled. Free from insect enemies and diseases. 6 to 8 ft., each, \$1.25.

POPLAR

LOMBARDY. Well known and remarkable for its erect, spirelike form. 4 to 6 ft., 50c; 6 to 8 ft., 75c.

THORN

PAUL'S DOUBLE SCARLET. A small tree or large bush with spreading branches. Flowers bright scarlet, large, full, very double. 3 to 4 ft., each, \$1.25; 3 for \$3.25.

TULIP TREE

This is one of the grandest of our native trees, with large, glossy leaves of peculiar shape and beautiful tulip-like flowers. A large tree in full bloom is a magnificent sight. 6 to 8 ft., \$1.25 each.

WEeping DECIDUOUS TREES

Weeping Birch

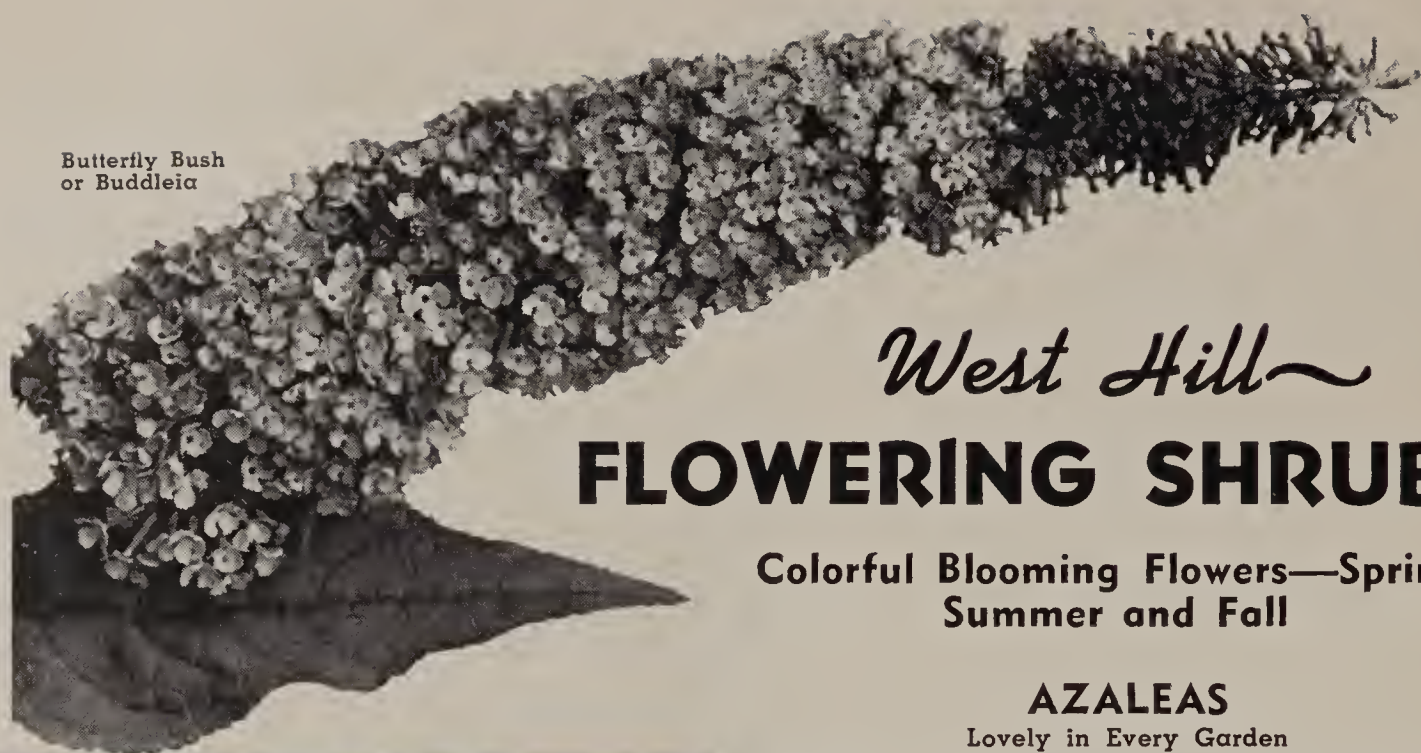

BIRCH, Cut-Leaved Weeping. One of the most popular of all weeping trees. A strong, upright grower with graceful, drooping branches, silvery white bark and delicately cut foliage. 5 to 6 ft., each, \$1.50.

CHERRY, Japan Weeping. A beautiful flowering Cherry; long, drooping limbs reach to the ground. Flowers of rosy pink cover these long, slender branches with masses of rosy bloom in early spring. 5 to 6 ft., each, \$3.00.

MULBERRY, Teas' Weeping. A graceful, beautiful, weeping tree, forming a perfect umbrella-shaped head, with long, slender, willowy branches drooping to the ground, gracefully swaying in the wind. Foliage lobed and of a delightfully fresh, glossy green. A rapid grower and exceedingly hardy. It bears edible berries in abundance—black and very sweet. 5 to 6 ft., \$2.00.

WILLOW, Wisconsin Weeping. Similar to Babylonian Willow but hardier. 6 to 8 ft., each, \$1.00.

Butterfly Bush
or Buddleia

West Hill~ FLOWERING SHRUBS

Colorful Blooming Flowers—Spring,
Summer and Fall

AZALEAS

Lovely in Every Garden

JAPANESE. Blossoming in May and June. Bloom in shades of lemon, orange, and red. Mixed colors. 12 to 15 inches, each, \$2.00, B. & B.

BARBERRY

THUNBERGI. See page 21.

RED-LEAVED. Its foliage is bronzy red which intensifies as summer advances, turning brilliant orange in autumn. Then come gay red berries which cling to the red stems all winter. Extra hardy. 12 to 18 in., 25c each; 10 for \$2.00. 18 to 24 in., 30c each; 10 for \$2.50.

BEAUTY BUSH

KOLKWTZIA AMABILIS. Foliage fine and glossy. Branches arching; covered with clusters of pink bell-shaped flowers in June. Strong, well rooted, 2 to 3 ft., 65c each.

BUTTERFLY BUSH or BUDDLEIA

Attractive to butterflies, long spikes of lavender flowers lure swarms of butterflies by their fragrance. Buddleia may freeze down in winter but comes up again in the spring and blooms with gayness from July until frost. 2 to 3 ft., each, 30c; 10 for \$2.50.

PINK CHARMING. A new and improved Buddelia, with large panicles thickly crowded with bright pink flowers. Strong, dark foliage. 2 to 3 ft., each, 75c.

Althea - Rose of Sharon

ALLSPICE

CAROLINA. A rare novelty in shrubs. Flowers chocolate-brown in color. 18 to 24 inches, 50c each.

ALTHEA

ROSE OF SHARON. This tall growing shrub is particularly nice because it blooms when others are out of flower. Supplied in colors of pink, white, red, purple, all double. Also single white and single blue. 2 to 3 ft., each, 25c; 10 for \$2.00.

Red-Leaved Barberry

DAPHNE

SWEET SCENTED. See page 28.

DEUTZIA

PRIDE OF ROCHESTER. Double white, back of petals tinged with rose. Excels other varieties in size of flower and length of panicle. 18 to 24 in., each, 25c; 10 for \$2.00.

GRACILIS. A charming dwarf variety. Yields a mass of pure white flowers about Decoration Day. 12 to 15 in., each, 40c; 10 for \$3.50.

DOGWOOD

RED BARKED. A shrub with blood-red bark and clusters of fine white flowers. 1½ to 2 ft., each, 40c; 10 for \$3.50.

VARIEGATED. One of the handsomest variegated-leaved shrubs. Bark brilliant red, leaves green, broadly margined with white. 1½ to 2 ft., each, 50c; 10 for \$4.50.

THE ELDERS

CUT-LEAVED. Foliage finely split up like the fingers of the hand. It bears great clusters of fragrant flowers with an abundance of useful berries. 2 to 3 ft., each, 50c; 10 for \$4.00.

GOLDEN LEAVED. Handsome golden yellow foliage. Elegant in a mass by themselves or with other contrasting shrubs. 2 to 3 ft., each, 30c; 10 for \$2.50.

FORSYTHIA

GOLDEN BELL. Before other leaves appear "Golden Bell" bursts into tumultuous bloom—lighting the whole garden with gay flowers that cover the entire bush. Upright Forsythia grow from 8 to 10 feet. 2 to 3 ft., each, 30c; 10 for \$2.50.

FRINGE

PURPLE (Smoke Tree). A shrub or small tree of spreading habit covered in midsummer with a profusion of dusky, hair-like flowers that give it the appearance of mist or smoke. Requires plenty of room. 18 to 24 inches, each, 50c.

GOLD FLOWER

(*Hypericum*). A small shrub with large, yellow flowers. Very fine. 12 to 18 inches, each, 50c.

HIGH BUSH CRANBERRY

Ornamental as well as useful. Its white flowers are followed by red berries hanging in clusters nearly all winter. 2 to 3 ft., each, 35c; 10 for \$3.00.

THE HONEYSUCKLES (Bush)

TARTARIAN PINK. Bears pink flowers in great abundance. 2 to 3 ft., each, 35c; 10 for \$3.00.

THE HYDRANGEAS

ARBORESCENS GRANDIFLORA (Hills of Snow). New. Blooms most abundantly from June to September. Flowers are pure snow-white. Its white panicles often measure 12 inches across. Perfectly hardy, easy of culture. 6 feet. 18 to 24 inches, each, 30c; 10 for \$2.50. 2 to 3 feet, each, 35c; 10 for \$3.00.

PANICULATA GRANDIFLORA (Bush Form). A popular hardy shrub; large, rich foliage; immense, pyramidal-shaped panicles of white flowers in August. Fertilize and prune severely. 18 to 24 inches, each, 35c; 10 for \$3.00; 2 to 3 ft., each, 40c; 10 for \$3.50.

PANICULATA GRANDIFLORA (Tree Form). Same as above but trimmed up into tree form. 3 to 4 feet, each, \$1.00.

KERRIA, JAPANESE

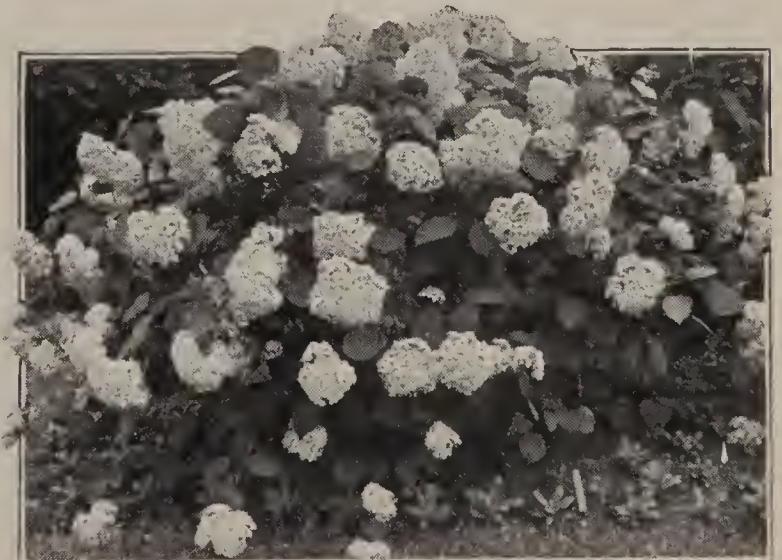

DOUBLE FLOWERING. Flowers of rich yellow, borne along slender and graceful stems. One of the first to bloom. 2 to 3 ft., each, 50c; 10 for \$4.50.

Deutzia Gracilis

Forsythia - Golden Bell

Hydrangea - Hills of Snow

THE LILACS

The Lilac is a well-known, very hardy shrub of easiest culture. The flowers grow in large panicles and are both gay and deliciously fragrant. The Lilac appears to best advantage when massed in groups. It is easily transplanted in either fall or spring. Moderately rich, moist soil suits it best. Remove dead flowers when blooming season is over. Do not prune in winter or spring.

Top—Alphonse Lavallee
Bottom—Michel Buchner

LILAC, Common White and Purple. Old-fashioned but well known. 2 to 3 ft., each, 35c; 10 for \$3.00.

NEW FRENCH LILACS

Sweetly Perfumed

Every home garden needs two or more New French Lilacs. Their colorful large trusses of sweet, fragrant, double flowers will scent up the entire yard with a delightful perfume. Do not fail to plant one or two of our New French Lilacs, you will always be pleased. A row of them makes an excellent screen. Blossoms are splendid for bouquets.

SUPERFINE VARIETIES

Strong, Heavily Rooted

ALPHONSE LAVALLEE. Double, large pale lavender.

HUGO KOSTER. Single, dark reddish purple.

MICHEL BUCHNER. Double pale lilac.

PRES. GREVY. Very double, lilac-blue.

SOUVENIR DE LUD. SPAETH. Very large, dark crimson-purple.

Prices for all varieties: 18 to 24 in., each, 50c; 10 for \$4.50. 2 to 3 ft., each, 60c; 10 for \$5.00.

THE MOCK ORANGES

Golden-Leaved — Sweet Scented Double Flowers

GOLDEN-LEAVED. Dwarf and very compact. Foliage is very dense and golden yellow throughout the season. Hardy and useful for grouping. 12 to 18 inches, each, 40c; 10 for \$3.50.

LARGE FLOWERING. This well loved favorite asks little but room to spread its graceful branches. A beautiful symmetrical bush 6 to 8 ft. tall, decked with fragrant white flowers in May and June. Foliage is very dense and golden yellow throughout the season, hardy; excellent for grouping. 2 to 3 ft., each, 30c; 10 for \$2.50.

VIRGINALIS. (New.) Best of all the Mock Oranges and truly the finest of the many white flowering shrubs. During June it is literally covered with great clusters of perfect, double crested, white blossoms. Height, 5 to 6 feet. 2 to 3 ft., each, 30c; 10 for \$2.50.

OLEASTER

The "Goumi" of Japan. A handsome, silver-leaved shrub bearing bright yellow flowers and orange-red, edible berries, about one-half inch long, which make delicious sauce. Showy and useful. 18 to 24 in., each, 50c; 10 for \$4.50.

PLUM

PURPLE-LEAVED (*Prunus Pissardi*). The foliage is of a bright purplish red all season. Entirely hardy. One of the most valuable shrubs on the list. 4 to 5 feet, each, 90c; 10 for \$8.50.

QUINCE

JAPAN. Bears a profusion of bright scarlet-crimson flowers before the leaves appear. Makes a lovely hedge. 6 feet. May. 2 to 3 feet, each, 50c; 10 for \$4.50; 100 for \$40.00.

SNOWBALL

COMMON. One of the best known old shrubs, bearing large balls of beautiful, snow-white flowers in June. Perfectly hardy. 8 feet. 2 to 3 ft., each, 45c; 10 for \$4.00.

SNOWBERRY

WHITE. Slender, medium-growing shrub, does well in any soil, flourishes under trees and in shady places. Leaves dark green and slender; small, rose colored flowers in June and July. Clusters of milk-white berries which last until winter. Grows 3 to 5 feet high. Very attractive as a hedge. 2 to 3 ft., each, 25c; 10 for \$2.00.

Mock Orange, Virginalis

Oleaster

Snowball

Spirea, Anthony Waterer

Spirea Van Houttei

Weigela Rosea

THE SPIREAS

ANTHONY WATERER. Large heads of dark crimson flowers, blooming all summer. 2 feet. 18 to 24 inches, each, 25c; 10 for \$2.00.

GOLDEN LEAVED. Golden yellow foliage; double, pure white flowers in June. A beautiful variety. 2 to 3 ft., each, 50c; 10 for \$4.00.

THUNBERG'S. A dense, feathery bush of neat and graceful habit. It bears pure white flowers in May and June. Foliage changes to a bright orange and crimson in fall. 18 to 24 in., each, 25c; 10 for \$2.00.

BILLIARDI. During July and August every branch and twig is tipped with a cone-shaped spike of rosy pink flowers. Very showy. 5 feet. 18 to 24 in., each, 20c; 10 for \$1.50.

VAN HOUTTEI. This variety is not only the finest Spirea, but is one of the best of all shrubs. Literally a fountain of bloom. White. 5 feet. June. 18 to 24 in., 20c each; 10 for \$1.50; 100 for \$10.00.

TAMARIX

AFRICAN. A hardy, vigorously growing shrub, with scale-like leaves and small, rosy pink flowers that appear before the leaves. 8 feet. May. 2 to 3 ft., each, 25c; 10 for \$2.00.

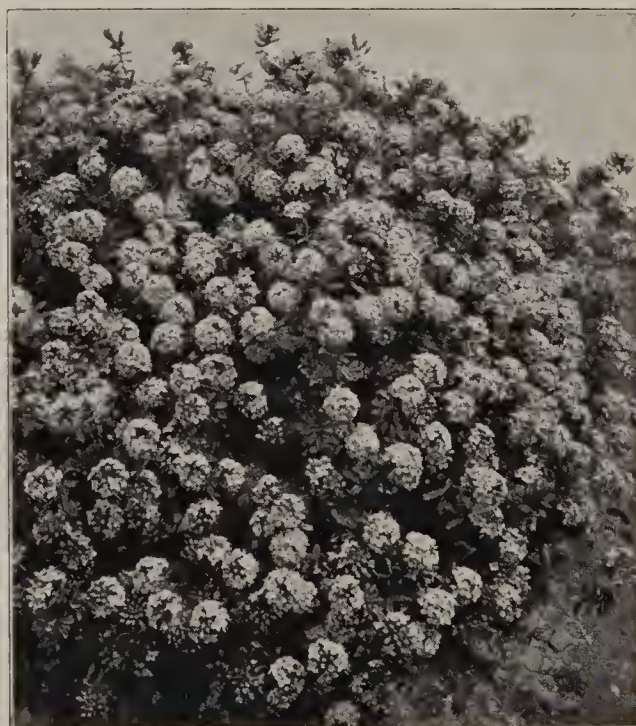

WEIGELA

ROSEA. From May to July, a glory of bright pink trumpet-shaped flowers. A vigorous dependable shrub, well foliaged and easy to grow. 18 to 24 in., each, 30c; 10 for \$2.50.

EVA RATHKE. Probably the best, most reliable of the red shrubs. Brilliant crimson-red flowers all summer. 2 to 3 ft., each, 35c; 10 for \$3.00.

WINTERBERRY

ILEX Opaca (Holly). A handsome bush of moderate growth. Blooms in June and produces masses of bright crimson berries in October which remain almost all winter. 6 to 8 feet. Requires a moist soil. 2 to 3 ft., \$1.00; 10 for \$8.50. Balled & Burlapped, \$1.75 each; 10 for \$15.00.

DAPHNE CNEORUM

(Garland Flower)

A lovely sweet scented shrub which blooms in spring and fall. These shrubs are of a spreading habit and do not grow over 10 to 12 inches high. The flowers completely cover the plant. Withstands cold temperatures and grow well in cold, poorly drained soil. Prices: 5 to 7 in. spread, 85c each; 3 for \$2.25. 9 to 12 in. spread, \$1.25 each; 3 for \$3.25.

West Hill ~

EXCEPTIONALLY FINE EVERBLOOMING ROSES

Enjoy the beauty and fragrance of perfect Roses fresh from your garden. Roses are not fussy as to soil. They will do well in any good garden soil. By starting with our big, husky, well rooted bushes one may grow perfect Roses even in the extreme north. Proper winter protection in the winter climates will assure good results year after year.

PRICES—POSTPAID

Field-grown, strong, 2-year, No. 1, 40c each; 3 for \$1.00; 10 for \$3.50.

Five of one variety or ten of not over three varieties at ten rate.

AMI QUINARD. A lovely semi-double deep crimson-maroon color with a blackish luster. Fragrant.

BETTY UPRICHARD. Never out of flower all summer, semi-double flowers of excellent orange-carmine.

DAME EDITH HELEN. Great double flowers of glowing pink on long strong stems, which gives you loads of Roses for cutting.

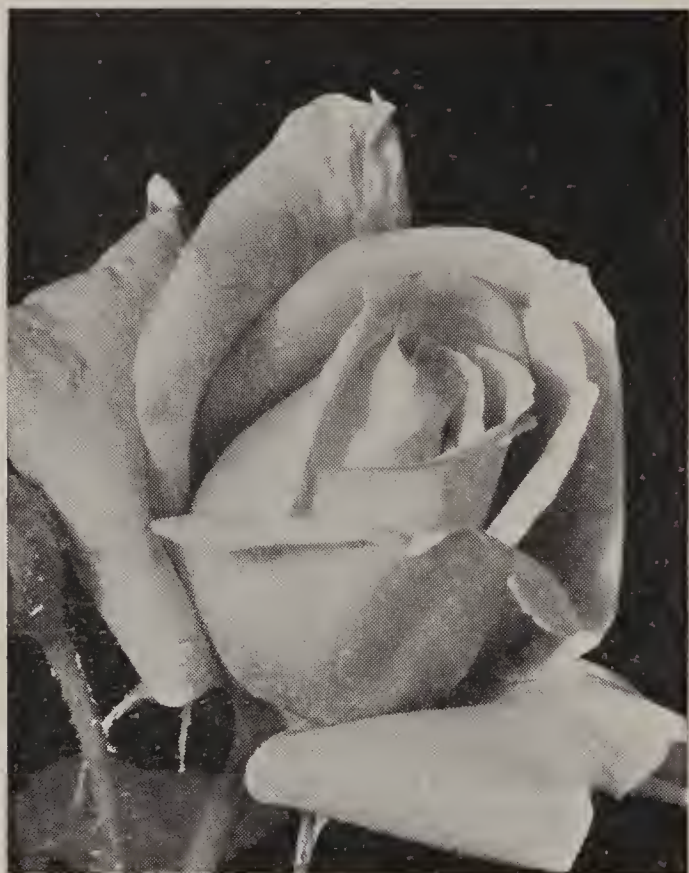

EDITH NELLIE PERKINS. A glowingly lovely two-toned orange-buff shading to salmon and coppery pink.

E. G. HILL. This magnificent Rose ranks first among the reds. Perfect buds of medium size unfold to great glorious flowers of fadeless red.

ETOILE DE HOLLANDE. Another excellent red with perfect form of bud and open flower. Intensely fragrant. Very popular, vigorous and bushy.

JOANNA HILL. Prettiest and hardiest yellow Rose. Long pointed buds, semi-double flowers, clear yellow shading orange.

KAISERIN AUGUSTE VIKTORIA. For more than 40 years the standard of excellence in white Roses. Buds of creamy white, flowers of delicate ivory, centers golden yellow.

EVERBLOOMING ROSES—Continued

LADY MARGARET STEWART. Brilliant orange-yellow, turning gold as the blossoms open. Over 54 petals.

MARGARET McGREDY. An importation from Ireland. This sturdy Rose should be in every garden; red, rose and flame on upper side of petal, the under surface suffused with gold. Moderately fragrant.

MISS ROWENA THOM. A cross of Radiance and Los Angeles—enormous double flowers of clear rose-pink.

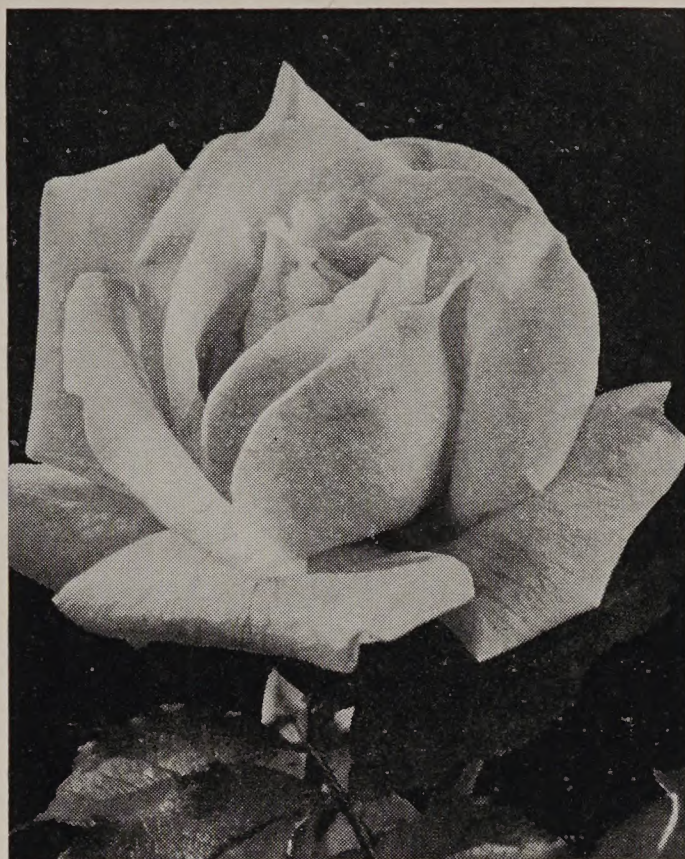

MRS. E. P. THOM. Best yellow bedding Rose of today. Full double flowers of clear deep canary-yellow. A plant of exceptional vigor.

PRESIDENT HERBERT HOOVER. A truly glorious Rose—rose-pink, flame-scarlet and yellow. Deep flowers of rare fragrance.

REV. F. PAGE-ROBERTS. A sensational variety; coppery buds, blossoms of sunny yellow. Loveliest in cool days of autumn.

SOUV. DE CLAUDIUS PERNET. A beautiful new salmon-yellow Rose. The buds are very long and pointed. Vigorous bush.

TALISMAN. The peerless cut flower variety. Lovely, combining gold, apricot, yellow and deep rose. Blooms all summer—a gold medal winner.

Talisman

Note—For special Rose collections, see page 2.

Choice Climbing Roses

Field Grown. Strong, 2-Yr. Specimens, Ready to Bloom.

Prices: 35c each; 3 for \$1.00.

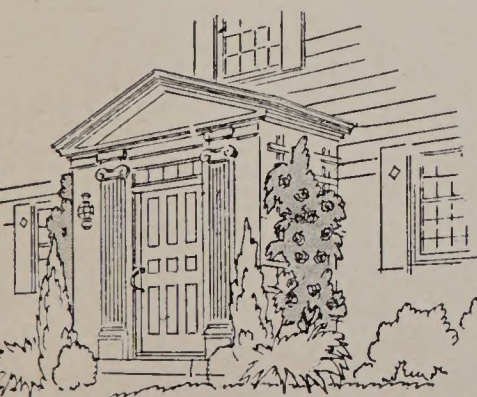

Five of one variety or ten of not over three varieties at 10 rates.

AMERICAN BEAUTY. Its delightfully fragrant blossoms are a surprising shade of carmine. Prefers shade and is at its best in cool seasons.

DR. W. VAN FLEET. Its lovely Roses, apple blossom color, grow in gorgeous profusion on individual stems. Midseason; perfect for cutting.

PAUL'S SCARLET. A sheet of color over a long, glorious season. Vivid scarlet semi-double flowers, three to twenty on long branching canes.

PRIMROSE. In full blossom it is a marvelous sight. Great semi-double yellow flowers, hardy in all sections.

Cultivated Blueberries

Not the old fashioned Blueberries that Dad had on his farm—but a new family of cultivated varieties that is finding favor in home gardens the country over. This superior berry is easy to grow, preferring acid soil liberally mulched with decayed leaves, etc. Cabot, height about 3 ft. Pioneer, height about 4 ft. Rubel, height about 6 ft.

Price: 2-yr. plants, \$1.00 each; 3 for \$2.50.

See page 13.

The Big Meaty GOLDEN MUSCAT Grapes

Bears every year and grows most anywhere with no trouble at all. This deluxe variety with the "California European" flavor carries West Hill's highest recommendation for home gardens.

Prices, postpaid: 1-yr., No. 1, 50c each; 2-yr., No. 1, 75c each.

For best results plant three of a kind.
